Pulse of progress.

The Audi A4. With even more technical finesse, even more comfort and even more powerful engines. And even more intelligence: All engine variants of the A4 models are equipped with the start-stop system as standard.

You see, a lot has changed, but one thing remains – the Audi A4 is unmistakeably an Audi. Unmistakeably a personality.

The fuel consumption and CO_2 emission figures can be found from page 117 onwards.

A4

Audi A4 Saloon | A4 Avant

A striking face. The new three-dimensionally worked bonnet is rounded off by the Audi Singleframe in stone grey. Side air inlets and redesigned angular front fog lights fit in harmoniously with the overall image. The optional newly designed xenon plus headlights not only look good, but also feature sophisticated technology, and are equipped with the homogeneous LED daytime running light strip.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

D
IN A 4003

The clear body line defines the classic Saloon silhouette which gives a balanced and elegant appearance. The continuous shoulder line and long bonnet visually stretch the car, whilst also giving a dynamic feel to the design. The powerful body sends a signal of self-assured sportiness, whilst the extended roof line emphasises its elegance.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

A superb synthesis of comfort and sportiness – the Audi A4 Avant. Its impressive proportions lend it a powerful appearance, the roof line and the shoulder edge fall slightly toward the rear, generating an impression of speed and dynamic performance. And with its impressive length of almost 4.70 m, it looks elegant and sporty.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

IN A 4008

The engines in the Audi A4: progressive, powerful, efficient. All the petrol engines are equipped with TFSI, a logical combination of economical direct injection and turbocharging or mechanical supercharger module. The TDI engines feature common rail injection technology and a diesel particulate filter; the 3.0 TDI engine is also available as a clean diesel version. As standard, all engines are equipped with the start-stop system and recuperation, which puts them among the most fuel-efficient engines of their class.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

Upon request, the A4 can be fitted with Audi drive select – an innovative feature that changes the feel of your Audi at the touch of a button, simply by selecting one of the different vehicle settings: comfort, auto, dynamic, efficiency or – in conjunction with an MMI navigation system – individual.

Working within system limits, three optional assistance systems support you during every trip. Audi active lane assist warns you if you inadvertently drift out of your lane, while Audi side assist signals if there is another vehicle in your direct vicinity in the adjacent lane during lane changing, for example. adaptive cruise control additionally keeps the correct distance from the vehicle in front.

The electromechanical power steering works depending on the speed and ensures greater steering precision and comfort. In addition, it only requires power if you actively request steering support.

Also new: the attention assist in the driver information system which analyses driving behaviour and recommends breaks, thus supporting the driver during longer journeys.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

The optionally available quattro permanent all-wheel drive distributes the drive force to all four wheels as required. On request, the quattro with sports differential offers additional dynamics. The electronically controlled sports differential ensures outstanding acceleration performance while cornering and more agile handling.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

IN A 4008

The luggage compartment in the Audi A4 Avant has a capacity of 490 litres, which increases to 1,430 litres with the rear seats folded down. Lashing points, bag hooks, a storage compartment with a net and a 12V socket provide further possibilities for using the luggage compartment exactly how you want to.

Standard in the Audi A4 Avant: the reversible luggage compartment floor. Covered on one side with high-quality velour, it can be easily turned over to become a hard-wearing dirt tray. On request, the A4 Avant is equipped with an electrically opening and closing luggage compartment lid. Also optional is a rail system with load-securing set consisting of telescopic bars and retaining strap – for even more improved transport of your luggage.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

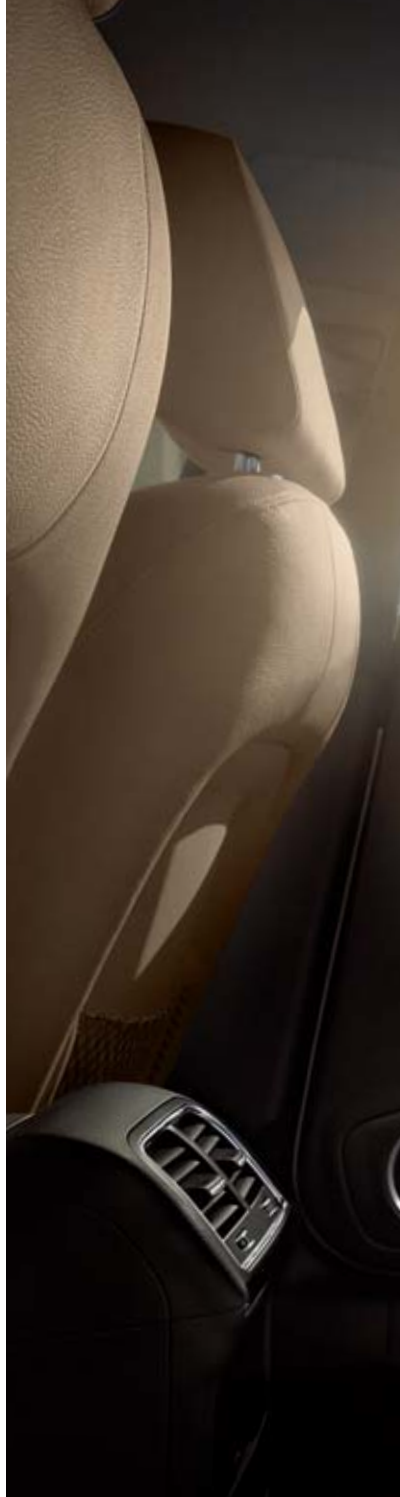
Lots of information, lots of space: the interior with its intelligently designed cockpit. Various details visibly enhance the quality and functionality of the interior. For example, the light switch, air conditioning, MMI rotary/push-button control, vents, mirror adjustment switches, window controls and the gear or selector lever gaiter are decorated with chrome trims. New interior colours and inlays, such as reflex finish in steel grey or moor brown or optionally aluminium Trigon give a sporty appearance; refined wood types, such as fine grain ash, natural brown lend an elegant appearance.

The optional MMI navigation plus has been enhanced. Its operation is intuitive via the MMI rotary/push-button control with integrated joystick or voice control. MMI navigation plus features include a high-quality 7-inch colour display with 3D map representation and a hard drive for your music and media files. On request, you even have numerous Audi connect services at your disposal in conjunction with the Bluetooth car phone online. These include the vehicle's own Wi-Fi hotspot, navigation with the aid of Google Earth images or traffic information online, for example. More information about these features can be found from page 60 and from page 99 in the infotainment and Audi connect sections.

In the interior the optional climate-controlled comfort seats in the front will impress you. You will experience luxurious comfort and excellent lateral support thanks to their soft feel and shaped side bolsters. The seat and backrest surfaces are ventilated and heated.

The optional efficient 3-zone deluxe automatic air conditioning is equipped with a sunlight-dependent control that sets the air temperature, flow rate and distribution electronically – with separate regulation for the driver and front-passenger sides and for rear passengers. The automatic recirculation mode by means of an air quality sensor and the combined particulates filter provide for even more pleasant air conditioning.



The Audi A4 Saloon and the Audi A4 Avant are more than just cars. They are mobile personalities – and built to a standard that you would normally expect in the luxury class. Thanks to the numerous equipment options, you experience many cars in one; but at the same time, a vehicle that is as unique as you are: your own personal Audi A4.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

Feel the difference.

One glance and you know who you are dealing with. A real character with many facets. A vehicle that not only impresses with its powerful appearance, but also one that is prepared to put its power to the test. The Audi A4 allroad quattro lets you feel the effect of the quattro permanent all-wheel drive on almost any road.

The fuel consumption and CO_2 emission figures can be found from page 117 onwards.

A4

Audi A4 allroad quattro

Real potential is something you notice long before it makes its presence felt. The Audi A4 allroad quattro does not need to flex its muscles. A selection of the latest generation of high-torque and efficient engines: The 2.0 TFSI petrol engine with Audi valvelift system thrills with its sporty dynamism, output of 155 kW and low consumption. And the high-torque 3.0 TDI engine is very convincing with six cylinders and 180 kW and is also available as a clean diesel.

The fuel consumption and CO_2 emission figures can be found from page 117 onwards.

IN A 4028

IN A 4028
A4

What characterises the Audi A4 allroad quattro? Many high-quality details immediately tell beholders what an exclusive vehicle they are viewing. The long wheelbase and the extended bonnet emphasise its power, whilst the new allroad-specific Singleframe in platinum grey with vertical struts underlines its rank in the premium segment. Enjoy the attention.

- A 37 mm higher body
- Concise allroad Singleframe and radiator grille with vertical chrome struts
- Widened wheel track
- Underbody protection, front and rear, in stainless steel
- 17-inch aluminium wheels in allroad-specific design (optionally 18-inch and 19-inch)
- Roof rails in aluminium with two webs, in black or optionally in anodised aluminium
- Wheel arch and sill extensions, and bumpers in contrasting paint finish (optionally for selected exterior colours painted in body colour)
- Aluminium-look exterior (optional), including with roof rails in anodised aluminium and sill extensions with stainless steel insert
- Door sill trims with allroad quattro logo
- allroad-specific seat upholstery in tundra cloth, black or titanium grey

The fuel consumption and CO_2 emission figures can be found from page 117 onwards.

IN A 4028

The Audi A4 allroad quattro is equipped with new inlays in reflex finish, steel grey or moor brown, as standard. On request, the interior can also be decorated with elements made of aluminium Trigon or different types of wood, for example fine grain ash, natural brown. And with the optional panoramic glass sunroof and Bang & Olufsen Sound System you can enjoy the surround sound effect almost as if you were outdoors.

With the optional MMI navigation plus you have the communication and entertainment electronics firmly within your grasp. On request, you even have numerous Audi connect services at your disposal in conjunction with the Bluetooth car phone online. These include the vehicle's own Wi-Fi hotspot, navigation with the aid of Google Earth images or traffic information online, for example. More information about these features can be found from page 60 and from page 99 in the infotainment and Audi connect sections.

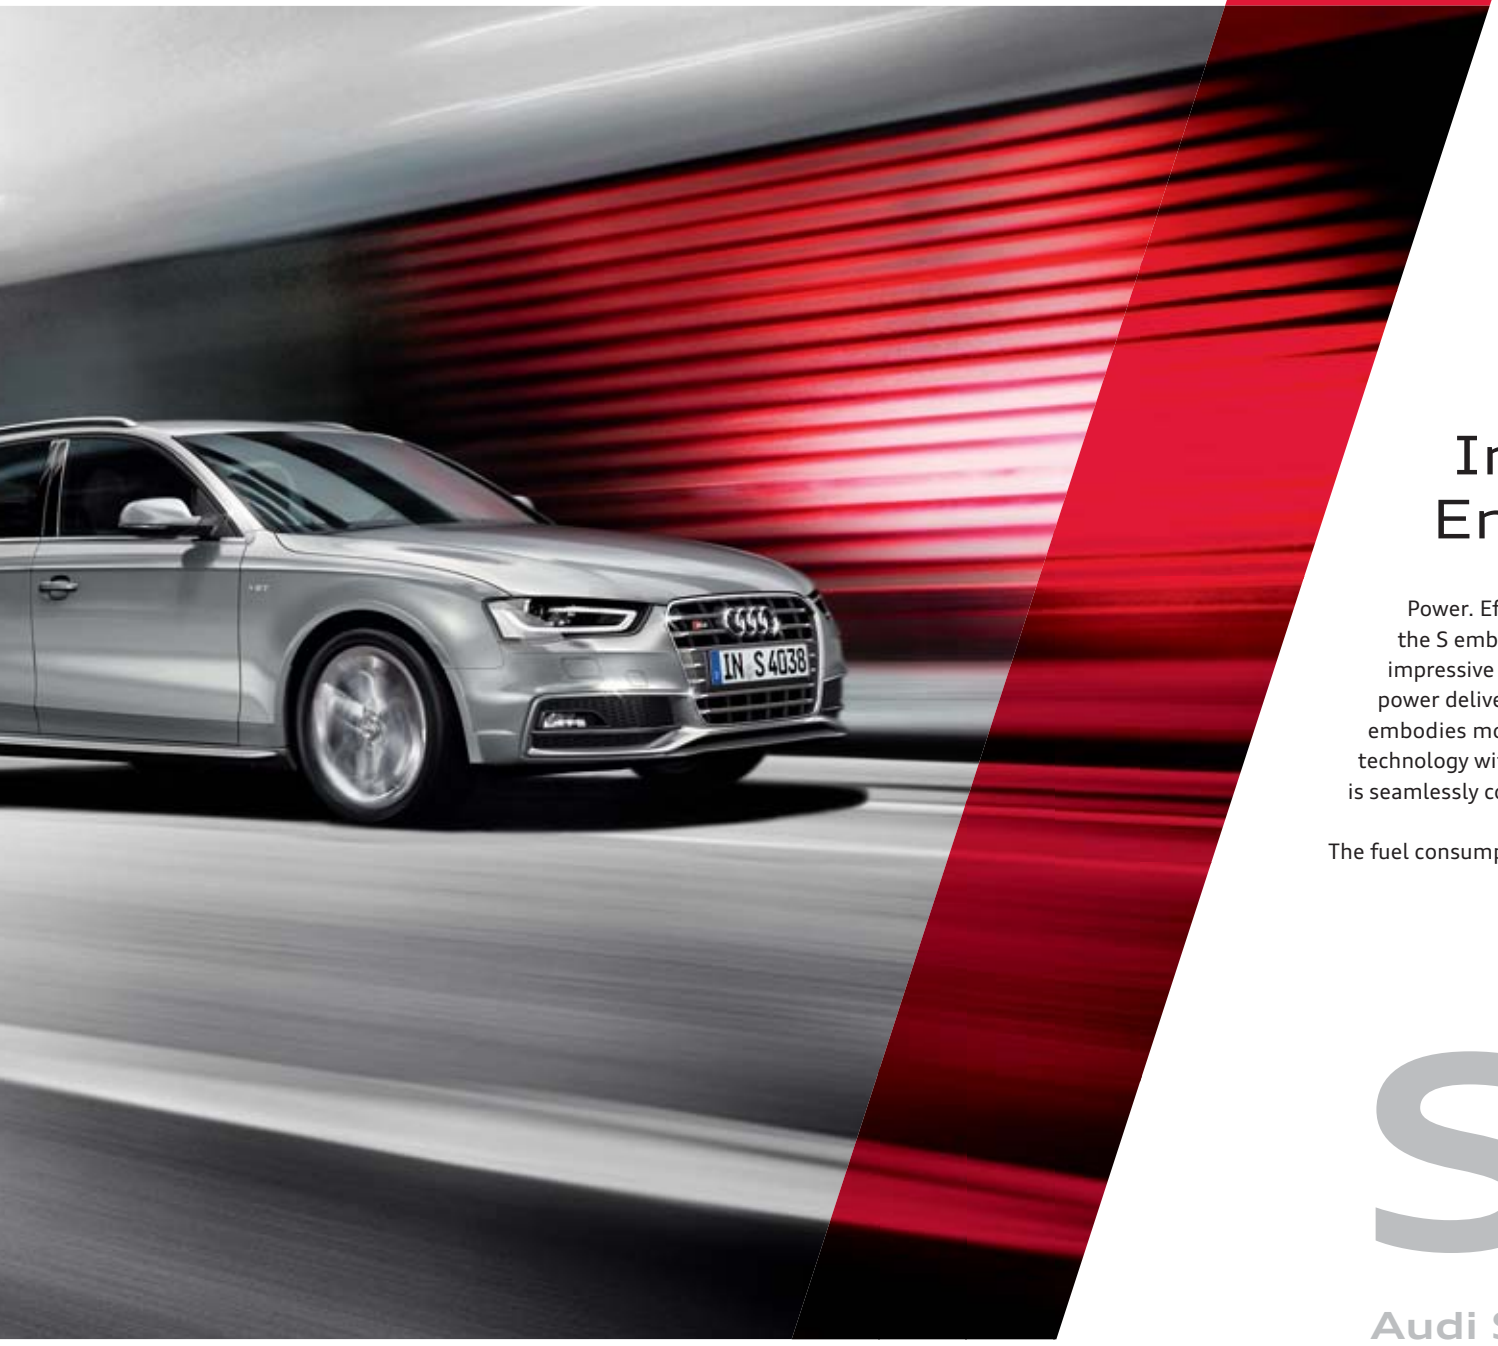
The fuel consumption and CO_2 emission figures can be found from page 117 onwards.

Don’t let the road tell you which way to go. The quattro permanent all-wheel drive distributes the drive force to the front and rear axle as required. The self-locking centre differential with wheel-selective torque distribution supports even more precise and dynamic cornering.

The efficient engine and the wide track bring you through off-road terrain with impressive propulsion. In doing so, quattro is supported by the electromechanical power steering and the Electronic Stability Control (ESC) with off-road detection. Off-road detection recognises the quality of the ground and varies the use of the electronics accordingly. The increased ground clearance turns the A4 allroad quattro into a vehicle even for poor roads – and turns poor roads into the most attractive routes.

The fuel consumption and CO_2 emission figures can be found from page 117 onwards.

S4
IN S 4003



Increased dynamics. Enhanced efficiency.

Power. Efficiency. Intelligence. Concepts that are united in one symbol: the S emblem. An Audi that bears this symbol in its name belongs to an impressive tradition of superior sports cars. Like the Audi S4. A car whose power delivery and acceleration are simply breathtaking. But the S concept embodies more than that. The Audi S4 combines powerful and efficient technology with a high degree of functionality. In other words: the Audi S4 is seamlessly continuing the S tradition – it is setting standards.

The fuel consumption and CO_2 emission figures can be found on page 118.

S4

Audi S4 Saloon | S4 Avant

The heart of the Audi S4 beats for motorsport – and powerfully at that. The supercharged 6-cylinder engine with an impressive 245 kW features intelligent TFSI technology. Thanks to its extremely spontaneous responsiveness and exceptional power delivery across the entire engine speed range, the 6-cylinder engine promotes a particularly dynamic driving style, which is additionally supported by the S sports suspension.

The fuel consumption and CO_2 emission figures can be found on page 118.

One vehicle – almost countless details that will attract your attention. The precise lines, almost exactly honed to size, that let the Audi S4 and the S4 Avant appear even more elegant and emotional. The new Bi-xenon headlights with the homogeneous daytime running light strip in LED technology. The newly interpreted Singleframe in platinum grey with horizontal chrome struts. The S-specific side grills with elegant double chrome trims. The S diffuser with blade in aluminium look. The S-specific dual-branch exhaust system, each with two oval-shaped tailpipe trims, that makes the S4 and S4 Avant appear even more muscular. The rear line that defines the car more precisely. The new crystal effect paint finish for even more brilliance. And of course, the distinctive mark of pure sportiness: the S emblem.

The fuel consumption and CO_2 emission figures can be found on page 118.

S4

A performance athlete, both from the outside and the inside. The sporty design of the exterior of the Audi S4 blends seamlessly into the cockpit. The S-specific instrument cluster with grey dials, white needles and S4 logo in the rev counter make you want to bring the V6 engine to life immediately. Whilst the optional ergonomically shaped S sports seats, front, with S4 embossing hold you firmly in place.

Like no other, the name quattro stands for the Audi brand and its sporting successes. Naturally, this proven technology comes as standard in the Audi S4, providing you with an exceptionally dynamic driving experience. The quattro permanent all-wheel drive with self-locking centre differential with wheel-selective torque distribution enables an outstanding acceleration performance and noticeably increased agility, accompanied by precise and even more controlled handling.

The optional quattro with sports differential combines the advantages of quattro technology with an electronically controlled differential that distributes varying amounts of drive force to each rear wheel. As a result, the Audi S4 is perceptibly more agile, particularly when cornering.

What this means for you is outstanding traction and an exceptionally enjoyable drive on virtually any surface. And all this with even greater safety.

The fuel consumption and CO_2 emission figures can be found on page 118.

S4
D IN S 4038

Dynamic driving does not know the meaning of the word pause. Especially when changing gear. Which is why, Audi has developed the S tronic 7-speed automatic dual-clutch transmission for faster gear changes. It combines the comfort and convenience of an automatic transmission for faster gear changes. with the sportiness of a manual gearbox – and does so extremely efficiently. The optional Audi drive select gives you a choice of modes at the touch of a button – comfort, auto, dynamic and efficiency. In addition, the personally defined individual mode can be set via one of the optional MMI navigation systems. Experience Audi drive select: up to five cars in one.

The fuel consumption and CO_2 emission figures can be found on page 118.

IN S 4003
S4

Your Audi also bears our mark of special efficiency.

Our vehicles embody not only sportiness, progress and technical innovations, but also the intelligent use of resources.

One example: the TDI engines with common rail technology. They provide highly efficient combustion of the diesel fuel due to the combination of direct injection and turbocharging. The TFSI engines with the Audi valvelift system (AVS) operate based on the same principle and are equally impressive thanks to increased output and torque with lower consumption. For years, Audi engines have been consequently further developed. This means that they are more powerful today than ever – at a reduced weight, thus reduced consumption. Impressive proof for our strategy to gain more power from less displacement. The start-stop system and recuperation also provide for more efficiency.

The S tronic® dual-clutch transmission utilizes the advantages of the high-torque engines of Audi ideal: its large transmission-ratio spread allows driving with high acceleration at very low engine speeds. This reduces the fuel consumption. The thermal management system, which provides precision heat distribution between the engine, the transmission, and the interior, shortens the warm-up period and thereby reduces engine and gear friction. The Audi drive select Modus efficiency mode helps you to realize additional saving potentials.

You see, the Audi A4 and S4 models feature a whole range of technologies that will make your journey not only more comfortable and dynamic, but more efficient, too. Find out more on the next few pages.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

Audi ultra on the podium: the Audi R18 TDI

Audi ultra:

Every gram less extends the lead.

Audi ultra, the pioneering lightweight technology from Audi, is more than just the sum of its individual components. It combines innovative materials, intelligent design principles and production processes that use resources sparingly into an overall concept. Many Audi ultra lightweight measures have already been implemented in the Audi A4 and S4 models.

That starts with the body. The steel shell design of the Audi A4 and S4 models combine low weight with high rigidity.
The design uses only as much material as necessary in the respectively right places.

Thin metal panels made of hot- and cold-formed steel in the body structure are combined with lightweight but sturdy aluminium in the body plating on the bonnet and wings, for example.

The aluminium components on the front and rear axle and the lightweight cast aluminium wheels not only reduce the overall weight but also the unsprung masses, which in turn leads to a further increase in driving comfort.

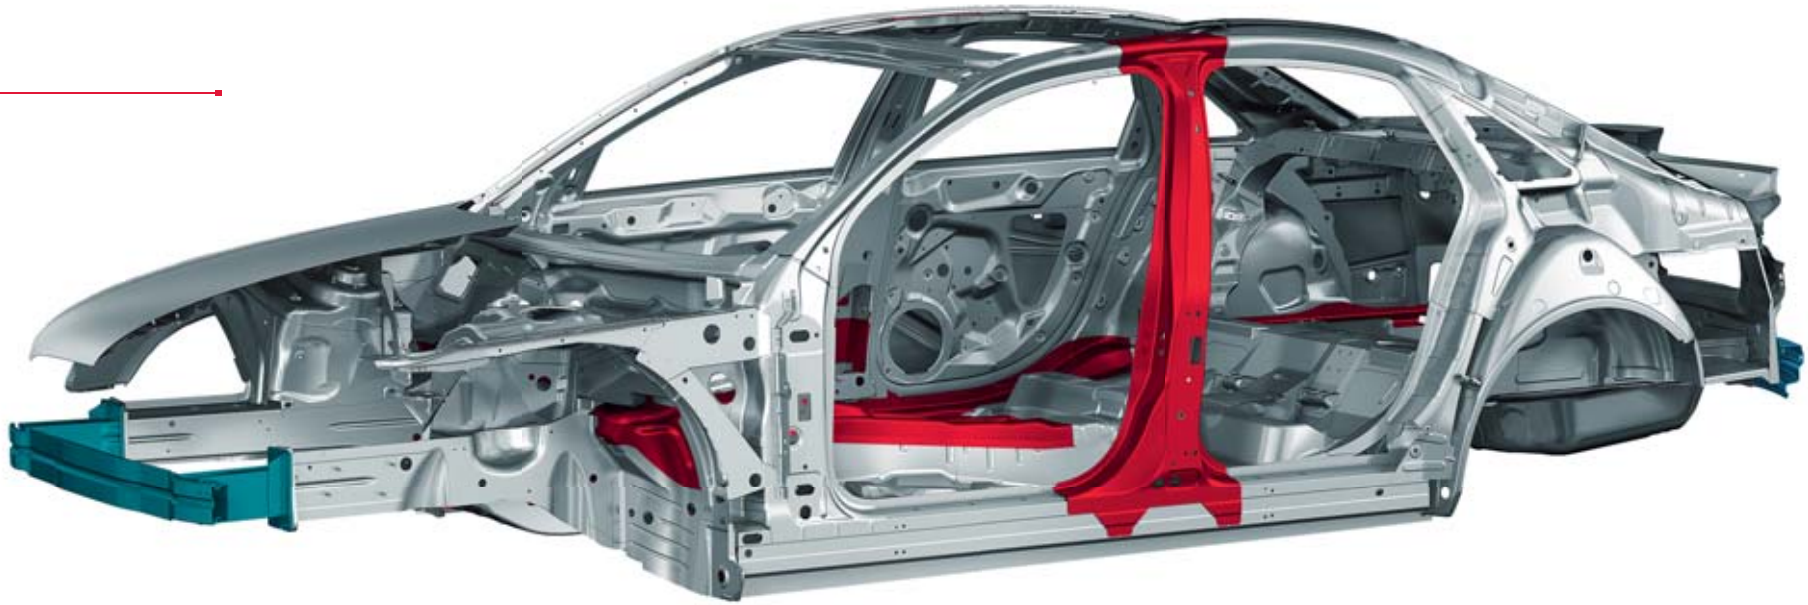
Drive technologies such as direct fuel injection and turbocharging have always made Audi engines more powerful. The modern TDI and TFSI engines in the A4 and S4 models produce more power with a smaller engine size, making them significantly lighter than the corresponding engines used in earlier series.

Each lightweight component has an effect on other components, allowing their dimensions to be reduced as well. The result is a continuous development process towards less and less weight and more and more efficiency. In figures: a vehicle that weighs 100 kg less can save up to 0.3 litres of fuel per 100 km.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

About weight reduction

The demands placed on modern vehicles are contradictory. On the one hand, they must offer enhanced performance and comfort, on the other they need to be more economical and efficient. Audi ultra resolves this conflict by examining each and every component. We demand the highest functionality combined with the lowest possible weight. The result is an intelligent mix of materials that even allows a reduction in engine size: lighter vehicles no longer need a large engine to be agile. In 2011, for example, the R18 TDI won in Le Mans with a V6 engine, whereas its victorious predecessor, the R15 TDI, had featured a V10 engine.



- Aluminium sheet
- Aluminium profile
- Hot-formed steel
- Cold-formed steel

1.8 TFSI engine

cylinder head with integrated exhaust-gas cooling

Audi valvelift system and double camshaft control

dual FSI/MPI injection system

powertrain with reduced friction losses

fully electronic coolant regulation

Many hours of development. Thousands of miles of testing. And for what reason?

In just a few seconds you will understand why.

The A4 models employ TFSI® technology. And the remarkable thing about it is that it combines the advantages of FSI® with a turbocharger, which ensures even better power delivery. All TFSI engines feature a start-stop system as standard and it goes without saying that they fulfil the EU5 emission standard. The 1.8 TFSI has 125 kW of power and a maximum torque of 320 Nm. It is one of the most fuel-efficient engines of its class. The Audi valvelift system lowers consumption, and the engine reaches its operating temperature faster thanks to intelligent thermal management. At the same time, this directs heat to the interior, which increases your comfort and helps to lower fuel consumption. With its 155 kW, the 2.0 TFSI has an output rating of up to 350 Nm. It is characterised by good consumption values and low CO_2 emissions. The 2.0 TFSI engine with 132 kW can also be operated with ethanol fuel E85. An additional contribution to reducing the carbon footprint, since this fuel is produced from renewable resources. The most powerful TFSI engine of the series, which is equipped with an innovative mechanical supercharging system with intercooling, is featured in the Audi S4. It turns the 3.0 TFSI V6 into a compact powerhouse – but one with moderate fuel consumption.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

The piezo injectors in the 3.0 TDI open and close in fractions of a millisecond and inject fuel several times into the combustion chamber at pressures of up to 2,000 bar. In some cases, an injection process can involve the injection of the tiniest of amounts weighing less than a thousandth of a gramme.

Pre-injection results in a "gentle" combustion process and consequently excellent combustion acoustics and agreeable engine running characteristics.

TDI®

In other words: Where is the tank?

One in every two Audi cars sold today is a diesel. What sounds perfectly normal now was cause for huge excitement 20 years ago, when Audi revolutionised the market with the first 2.5 litre TDI engine. Since then, developments such as common rail technology with its refined and precise fuel distribution have made TDI even more efficient. Consequently, since the first TDI, the engines have become more economical, whilst specific output has increased. So it was only logical that a diesel car should then enter the world of motorsport. And successfully too: in 2006, Audi was the first car maker to win the Le Mans 24 Hours with a diesel-powered race car, the Audi R10 TDI – a victory which it has repeated several times over, most recently in 2011.

Powerful 2.0 TDI and 3.0 TDI engines are available for the Audi A4, and these are equipped with intelligent common rail diesel technology. In addition, they are equipped with the start-stop system as standard. The 3.0 TDI (180 kW) is additionally available for the A4 and A4 allroad quattro as clean diesel. This engine employs a technology that systematically reduces nitrogen oxides. In addition to their efficiency, the TDI engines are of course also characterised by their power. With the Audi A4 Saloon and the A4 Avant which are driven by 2.0 TDI engines with 100 kW and 112 or 116 g CO_2/km, and with 120 kW and 115 or 120 CO_2/km, the balance between performance and consumption has been specifically further improved. These models are in particular characterised by a low consumption and reduced CO_2 emissions.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

improved flow in the cooling water circuit

2.0 TDI engine

Why only use two wheels when a car has four?

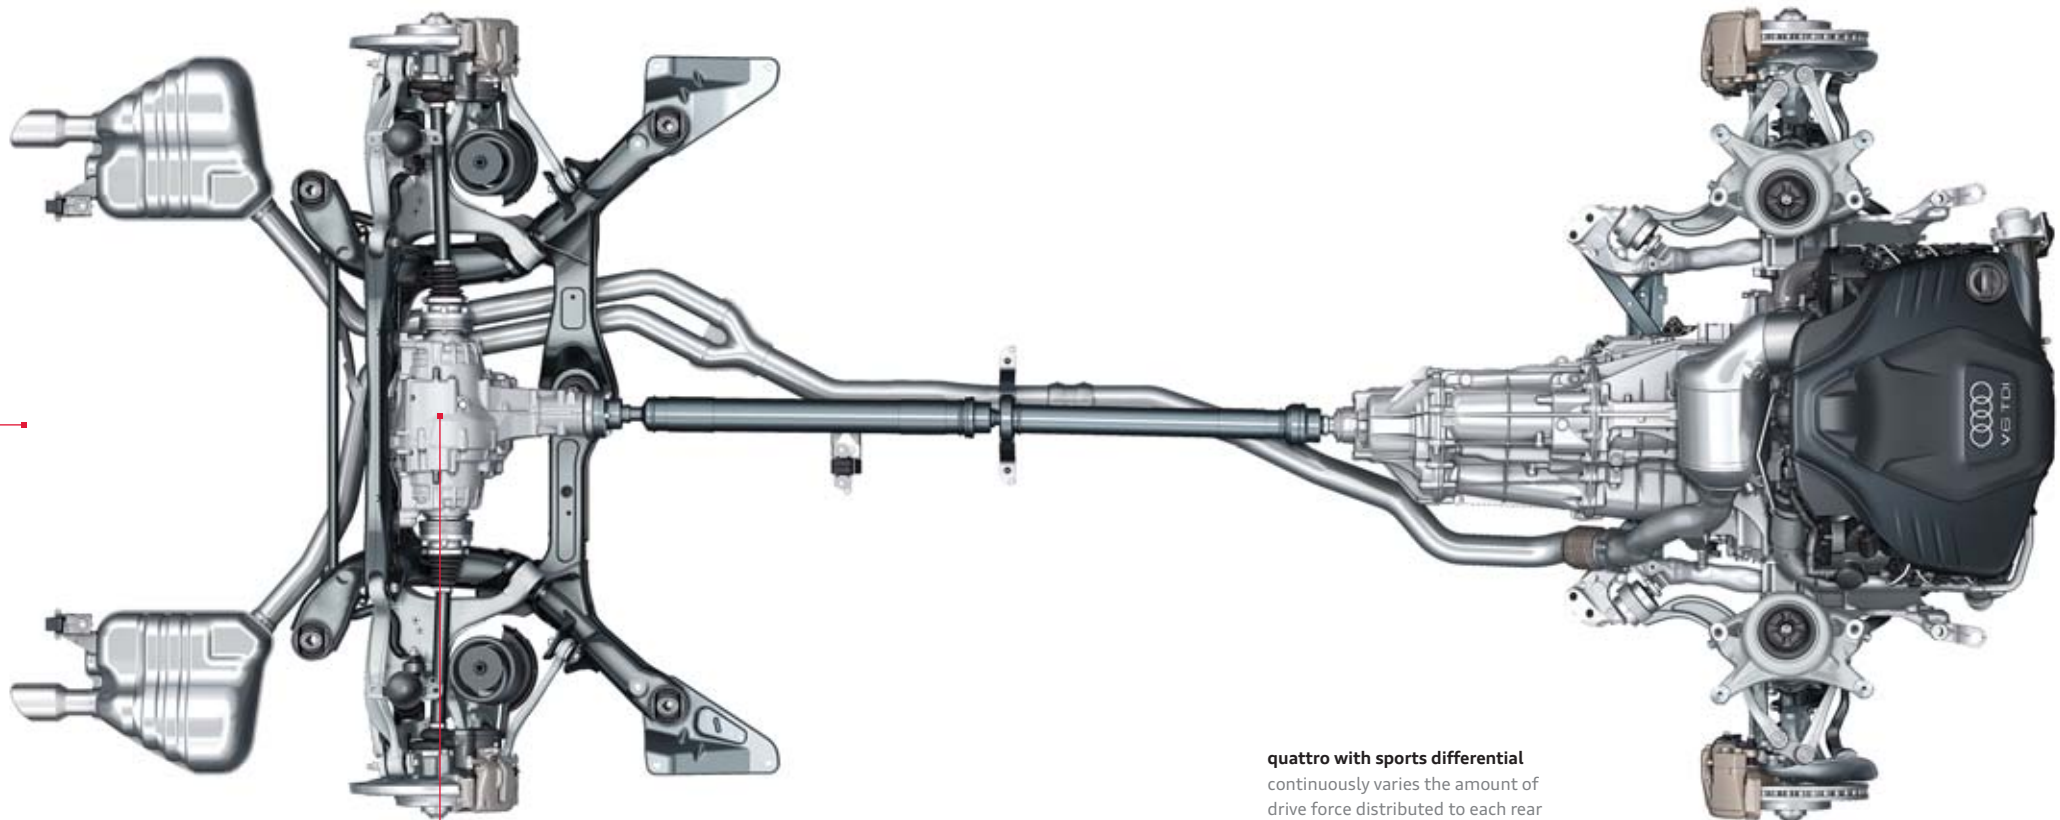
The quattro® permanent all-wheel drive.

quattro is a permanent all-wheel drive system. If the wheels on one axle of the vehicle lose grip on the road and threaten to spin, then the drive force is transferred to the other axle – automatically and permanently distributed through the self-locking centre differential with wheel-selective torque distribution. The basic distribution is 40 : 60 – 40 % of the drive force comes from to the front axle, 60 % from the rear. The benefit is better traction during acceleration and improved safety due to exceptional grip. So much for the technology. But what makes quattro unique is really the driving feel.

"As if you are stuck to the road," some customers say. We put it like this: quattro gives you more feel for the road and thus increased safety.

The quattro with sports differential further reinforces the unmistakeable quattro feeling. Vehicles tend to experience understeer when steering or driving into corners. This is a normal physical process: A moving object opposes a change in direction. The elastic tyres and the suspension mounts tense up until the new direction has been adopted. When accelerating into a corner, the load on the front axle is reduced and it therefore transfers less lateral force to the tyres – the vehicle understeers. With the sports differential on the rear axle, the tendency to understeer is largely counteracted. This is because the quattro rear axle differential has been extended left and right by a clutch system with two gear levels. They ensure that the individual wheels on the rear axle receive different levels of torque. The clutches are activated by an electro-hydraulic actuator. Depending, for example, on the steering angle, lateral acceleration, yaw angle and driving speed, the system calculates the right distribution of wheel torque for any driving situation. In this way the power is specifically channelled to the outer rear wheel, when steering or accelerating into a corner. The effect: the vehicle is effectively pressed into the corner and follows the angle of the front wheels.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.



quattro with sports differential
continuously varies the amount of drive force distributed to each rear wheel and ensures high cornering agility and impressive driving dynamics.

Why do the Audi A4 and S4 suit you so well? Because they adapt themselves to you so well.

Audi drive select.

comfort

dynamic

auto

efficiency

individual

Everybody defines driving dynamics differently. We define it like this: drive exactly how you feel. With the optional Audi drive select, you can influence individual vehicle components at the push of a button and so change the character of your Audi.

You have up to five modes to choose from: efficiency, comfort, auto, dynamic and, in conjunction with one of the optional MMI navigation systems, individual mode, allowing you to determine yourself how the associated vehicle components should behave. The comfort mode is especially suitable for providing the most relaxed driving possible on long journeys. The auto mode offers a generally comfortable yet sporty driving experience. For particularly sporty driving, for example on winding roads, there is the dynamic mode. The efficiency mode improves the car's overall consumption. As an integral part of Audi drive select, it is characterised by more energy-efficient operation of the engine and auxiliary consumers, e.g. air conditioning, as well as changing the shift program in models with automatic transmission. In every mode, the vehicle adjustments depend on the equipment present. Audi drive select interacts as standard with engine, automatic transmission and steering. Other features you can also influence – if fitted – include the suspension with damper control, the dynamic steering and quattro with sports differential. The engine and gears react more spontaneously or in a more balanced manner to movements of the accelerator, depending on the mode chosen. Moreover, the engine speeds at which gear changes take place are varied in models with automatic transmission – in dynamic mode, they only happen at higher engine speeds, while in comfort mode they take place at lower ones. The steering can also be adapted to the driving situation, from sporty and firm to comfortable. In conjunction with the dynamic steering additionally between sporty-direct and comfortable-indirect. quattro with sports differential distributes the drive force variably to the rear axle to attain a high level of agility and acceleration performance while cornering. adaptive cruise control can also be set to be either more balanced or more spontaneous in relation to acceleration behaviour and as a reaction to the vehicle in front.

The fuel consumption and CO_2 emission figures can be found from page 110 onwards.

Research project: “Audi Urban Mobility”

Unmanned to the summit.

How useful it can be to network a vehicle with its environment is demonstrated by the research project “Audi Urban Mobility”. As part of this project, a vehicle was created based on the Audi TTS. In September 2010, this vehicle managed to climb the 20-kilometre Pikes Peak road in the Rocky Mountains unaided and without a driver. The project featured an electronics system that helps drivers to avoid hazardous situations. We are applying this know-how to make continual improvements to Audi connect. So that you are more and more connected, and your journeys safer.

Audi connect:

The intelligent connection between the Internet, the vehicle and you.

The world is a network – and your Audi is part of it. Audi connect not only brings the Internet into your vehicle, it also exploits the possibilities that your smartphone, tablet or laptop provide. In future, Audi connect will also make it possible to exchange data between the vehicles as well as between vehicle and infrastructure. For even more driving pleasure and comfort:

With Audi connect you can use the MMI to easily search the Internet for special destinations, or get the latest news and the current weather forecast for your intended navigation destination. Data is transferred via the UMTS module of the Bluetooth car phone online, which can be ordered as an option for the MMI navigation plus.

Audi connect also offers you wireless Internet access via a Wi-Fi hotspot. During the ride, passengers can retrieve information and e-mails or surf the Internet using their mobile device.

There is an application for Audi music stream[1] available for some smartphones. Detailed information about availability, usage rights and charges can be found in the equipment section or obtained from your Audi partner.

[1] For information on when this feature will be available, please contact your Audi partner. [2] Google and the Google logo are registered trademarks of Google Inc.

Audi music stream[1]
Access to global radio stations via smartphone app and Wi-Fi connection

Destination entry via myAudi or Google Maps

Point-of-interest search including voice control

Navigation with Google Earth images[2]

Traffic information online
Detailed information on traffic flows, e.g. for individual stretches of road; faster information on the occurrence and clearing of traffic jams

Google Street View[2]
For 360-degree exploration

News online
Text and images about current world events

Weather
Forecasts and maps for the required destination

Travel information
The latest travel tips and diagrams from the Internet for the route chosen

Wi-Fi hotspot

If you want to experience the full diversity of Audi connect, scan this QR code using your smartphone. Or follow this link in your browser: www.audi.com/audiconnecta4

Radio: the integrated radio receiver is set up for VHF, LW and MW and optionally transmits digital radio with a continually updated station list.

Media: display of available media sources such as the jukebox, inserted SDHC cards, Audi music interface or CDs and DVDs; display of optional TV tuners

Telephone/Bluetooth: the optionally available preparation for mobile phone (Bluetooth) and Bluetooth car phone online has a selection screen containing call lists, directory and selection interface as the start-up setting.

Follow your intuition.

And you'll get there.

We try to match up to our claim of "Vorsprung durch Technik" in every aspect of an Audi – for example with the advanced MMI – Multi Media Interface. The MMI is used to control a wide variety of media in the car, as well as the navigation system and other convenience functions.

It used to be simple to operate the MMI – but the new MMI navigation plus makes it even easier, with a reduced number of buttons for a better overview. All six so-called hard keys, for telephone or navigation functions for example, are located around the central rotary/push-button control – for intuitive operation. The buttons for radio and media are logically located close to the volume control. Among the things available in conjunction with Bluetooth car phone online are Google Earth images. The point-of-interest search will take you to restaurants, sites or other places that might be interesting for you. And on request, Digital Audio Broadcasting reception guarantees even more music enjoyment.

By the way, you can make all your navigation system entries by voice control, leaving you more relaxed when you reach your destination.

Car: this function allows the direct control of driver assistance systems, vehicle settings, climate control and service functions.

Audi connect: traffic information online
You not only get the right route to your destination but the quickest one too. In addition to traffic flow information, traffic information online provides faster information on the occurrence and clearing of traffic jams for dynamic route guidance as well as greater coverage of the road network.

Audi connect: travel information/weather provides weather forecasts and relevant information, such as charts and weather maps relating to the destination. **Audi connect: News online** provides comprehensive news items about current world events.

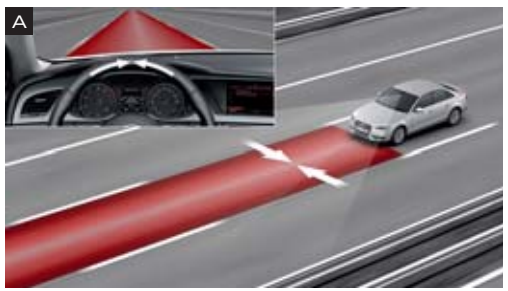
Audi connect: navigation with Google Earth images and Street View enables navigation with high-resolution aerial and satellite images, photographs, topographical features, roads and their designations, and business entries. Street View gives you a realistic picture of your destination even before you get there. You can access detailed information on places to visit using the **point-of-interest (POI) search function** with voice control. **Destination input by means of myAudi or Google Maps** enables you to plan your route on your home computer with individual navigation destinations, and then send it to the vehicle. When you start your journey, the route plan is loaded into MMI navigation plus.

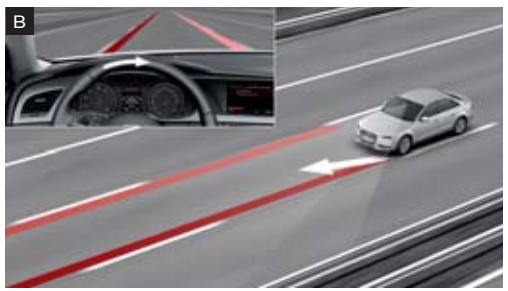
You sit at the wheel.

Others are working in the background.

Most road accidents are caused by human error. Modern assistance systems can help to reduce their severity. Audi puts various different technologies to work to help you reach your destination safely. The assistance systems are closely networked, which increases their intelligence, versatility and performance. With the help of these systems, your journey will be safer and more relaxed.

adaptive cruise control including Audi pre sense front:* automatic distance control (control range 30 – 200 km/h); working within system limits, it uses a radar sensor to detect vehicles ahead and maintain this distance by automatic braking and accelerating; 4 distance levels and different driving modes can be selected individually; including Audi pre sense front: The Audi braking guard warns the driver about a detected imminent collision with the vehicle in front through an extended braking assist feature; extended by the function of maximum deceleration: this is initiated at speeds below 30 km/h if there is a danger of collision with a stationary or moving vehicle in order to avoid this collision if possible.





Audi active lane assist*: lane compliance assistant; supports the driver within system limits comfortably in keeping in the lane (operating range 60 – 250 km/h). If the system is activated/ready and the driver has not operated the indicators, the Audi active lane assist will guide the vehicle within recognised lane boundary lines by means of gentle, corrective steering intervention; the driver can choose whether he would like to be monitored continuously or just shortly before crossing the traffic lane marker (choice of earlier or later steering time); additional steering vibration can be adjusted if the driver wishes

Audi side assist*: lane change assistant, working within system limits at speeds of 30 km/h and above, the system uses radar technology to monitor the area on the left, right and behind the moving vehicle and informs or warns you by means of an LED display in the exterior mirror if the Audi side assist has detected another vehicle assessed as critical for lane-changing.

Please note: the systems can only work within system limits. They can be of assistance, but drivers are still required to be attentive at all times.

It is only the equipment that turns an Audi into your Audi.

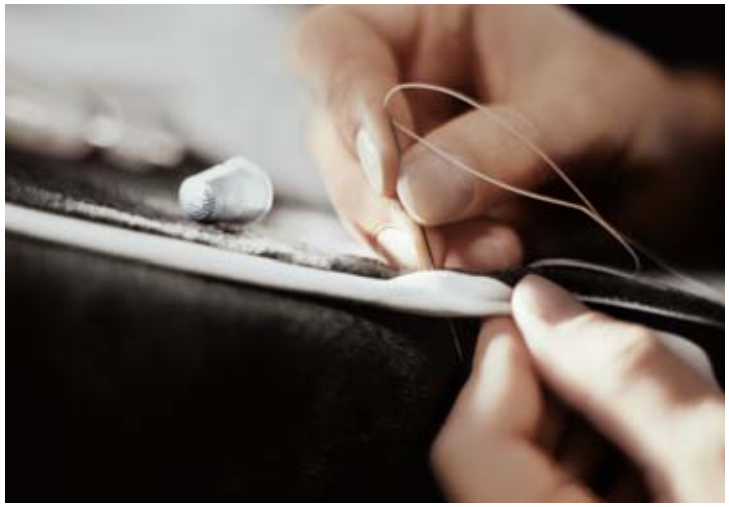
Audi exclusive

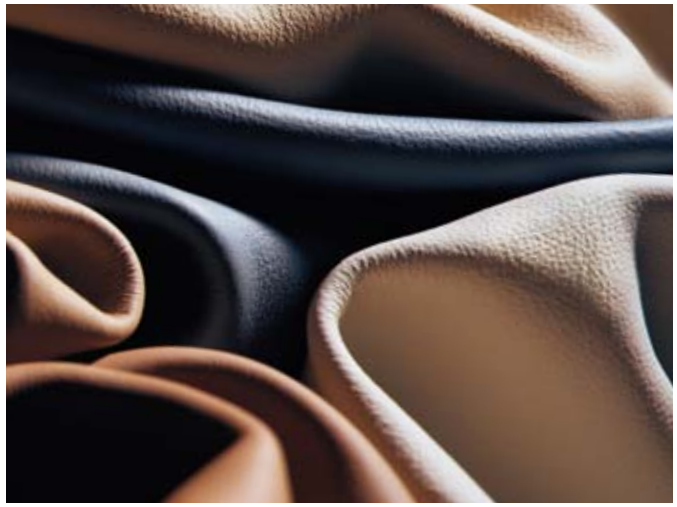
Exclusivity does not know the meaning of the word compromise. But it is familiar with endless variety.

Each year Audi sells hundreds of thousands of vehicles. Yet they only sell yours once. How is that possible? With a quattro GmbH service that makes your Audi unmistakeable: Audi exclusive.

Combine selected woods, coloured leather and a customised paint finish from the large selection of colours available from Audi exclusive to suit your personal wishes. Your unique vehicle will be the result.

Your Audi partner and the Audi exclusive Studio of the Audi Forum Neckarsulm await your wishes.





Audi exclusive leather upholstery and trim (package 2) in Valcona leather in magnolia with piping and contrasting stitching in black. Oak sepia inlays. From quattro GmbH

Sports seats, front, with two-colour seat upholstery in cognac/black with piping in fine Nappa leather and coloured stitching to match the seat centre sections. Inlays in piano finish, black. From quattro GmbH

for the door trims front and rear, and in the centre console, if the front centre armrest has also been ordered. (A4/A4 Avant/A4 allroad quattro)

Audi exclusive inlays
available in fine grain ash, nougat, oak sepia, fine grain myrtle, nutmet and piano finish, black.
From quattro GmbH

Light

Headlights
halogen headlights utilising free-form technology with clear glass covers, electric headlight range control and parking light function, daytime running lights with separate reflectors

adaptive light
Working within system limits, the dynamic cornering light identifies the course of the road. The headlights swivel – depending on the steering angle – towards the curve and in this way variably illuminate the course of the curve. The adaptive light is operational between speeds of approx. 10 km/h and 110 km/h. Includes turning light, which switches on automatically if the indicators have been engaged for some time and illuminates the new direction of travel.

xenon plus including headlight cleaning system
The headlights with durable gas discharge technology for dipped and high beam enable an intensive illumination of the road with evenness and range, in a colour resembling daylight both close-up and in the distance. The automatic-dynamic headlight beam control prevents oncoming traffic from being dazzled; homogeneous daytime running light strip and rear lights in LED technology with low power consumption, rear number plate light in LED technology

High-beam assist
working within system limits, automatically detects the headlights of oncoming traffic, the rear lights of other road users and built-up areas. Depending on the traffic situation, the high beam is automatically switched on or off. The system thereby improves the driver's visibility and ensures a more relaxed drive thanks to the extra comfort and convenience.

Rear lights
in red, reversing lights in white, integrated rear fog lights, rear number plate lights in LED technology

Interior lighting
with delayed switch-off and contact switches on all doors; lights for luggage compartment, driver, front-passenger and rear compartment, 2 reading lights at front, interior light at rear, illuminated vanity mirrors, ambient lighting

Lighting package
includes rear reading lights, illuminated vent controls and inside door handles, active door reflectors, entrance lighting, footwell lights front and rear, illuminated glove compartment

LED rear lights
brake/rear, fog, indicators and rear number plate lights in LED technology; reversing lights have light bulbs

Front fog lights
integrated in the bumper

Headlight cleaning system
uses water and high pressure, for excellent illumination, less scatter and good visibility

Light/rain sensor
for controlling the automatic headlights, the coming home/leaving home function and the automatic wiper function, includes windscreen with grey strip along the top edge

The model-specific standard and optional equipment can be found in the index from page 124 onwards.

Mirrors

Exterior mirrors with integrated LED indicator
electrically adjustable, convex, flat or aspherical mirror glass, housings painted in body colour; additional for S4/S4 Avant: Heated exterior mirrors and windscreen washer jets; housing in aluminium look

also optionally:

heated
including heated windscreen washer jets

heated and electrically folding
including heated windscreen washer jets and automatic kerb-side function for the exterior mirror on the passenger side

heated and folding, automatically dimming on both sides
including heated windscreen washer jets and automatic kerb-side function for the exterior mirror on the passenger side

heated and folding, automatically dimming on both sides with memory function
including heated windscreen washer jets and automatic kerb-side function for the exterior mirror on the passenger side

The automatic kerb-side function tilts the exterior passenger mirror downwards when reverse gear is engaged, giving the driver a better view of the kerb.

Interior mirror
dimming

also optionally:

automatically dimming
with light/rain sensor and windscreen with grey strip; including windscreen with acoustic glazing for improved windscreen insulation and a reduction of outside noise

Roof systems

Slide-and-tilt glass sunroof
electrically operated, made from tinted single-glazed safety glass with infinitely adjustable sunscreen; integrated wind deflector, convenience locking/opening from outside via the central locking and the radio-operated remote control

Panoramic glass sunroof
2-piece, electrical activation to raise and open the front glass section; tinted glass insert, fine-mesh sun shield electrically adjustable to any position over the entire glass area, convenience closing from outside via the central locking. The panoramic glass sunroof ensures a bright atmosphere in the interior and an open feeling of space, and when open ensures a pleasant supply of fresh air during the journey.

Roof rails, anodised
for safe transportation of items, strong and aerodynamically shaped; in aluminium; for A4 allroad quattro: in aluminium with 2 webs

Roof rails, black
for safe transportation of items, strong and aerodynamically shaped; in aluminium; for A4 allroad quattro: in aluminium with 2 webs

Closing systems

Central locking
with radio-operated remote control integrated in the vehicle key and variable code. The central locking opens and locks doors, luggage compartment lid and tank flap at the touch of a button; includes convenient closing/opening of windows and separate luggage compartment lid unlocking function via the radio-operated remote control; additional activation from inside on the driver's door; for S4/S4 Avant: remote control key with S4 emblem

Convenience key
access and drive authorisation system; the key only needs to be carried with you; the engine is started and switched off via the engine start-stop button on the centre console, the vehicle is locked from outside via buttons on all door handles. The vehicle can also be opened from the luggage compartment lid.

Electronic immobiliser
integrated in the engine control unit, automatically activated by the car key

Luggage compartment lid, automatically-opening
When the luggage compartment is released by the radio-operated remote control, the button in the driver door or by the soft-touch release on the luggage compartment lid, the luggage compartment lid automatically swings open.

Luggage compartment lid, electrically opening and closing
Opening via button on vehicle key, the radio-operated remote control, button in the driver door or soft touch button in the luggage compartment lid handle recess, closing via the button on inside of luggage compartment lid; with closing assistance and programmable luggage compartment lid opening angle

Garage door opener (HomeLink)
programmable radio-operated remote control, operating buttons integrated in the interior lighting module; can be used to open many garage doors and exterior gates; allows control of security and lighting systems; in conjunction with MMI navigation plus with program support through the MMI and set-up assistance from appropriate logbook information on the screen. (For information on compatible hand-held transmitters, please contact your Audi partner or visit www.eurohomelink.com).

Anti-theft alarm
including interior monitoring system and tow-away protection via angle of inclination sensors, can be switched off; signal horn for monitoring doors, bonnet and luggage compartment lid independent of vehicle electrical system

Preparation for tracking system
preparation for connecting a tracking system (available from Audi Genuine Accessories) that enables a stolen vehicle to be located

Ignition lock
electronic, ignition key features integrated chip, automatically stores relevant vehicle service data (mileage, chassis number and much more)

Glazing

Manually operated sunblinds for the rear door windows

Sunblind, electrically adjustable for the rear window

Electric sunblinds for the rear window and manually operated for the rear door windows

Heat-insulating glass
green tinted, windscreen made of laminated glass

Dark-tinted windows (privacy glazing)
dark-tinted rear window, rear door windows and rear side windows

Rear window
heated, with timer switch

Windscreen cleaning system
2-speed operation, 4-speed adjustable intermittent wipe, flick-wipe function, automatic wash/wipe function; for A4 Avant/A4 allroad quattro/S4 Avant: rear window wiper activated when reverse gear is engaged and wipes for the duration of the reversing manoeuvre (when front wipers are switched on)

The model-specific standard and optional equipment can be found in the index from page 124 onwards.

Further exterior equipment

Provision for trailer towing hitch
includes the wiring to the spare wheel well, a prepared ABS control unit and reinforced engine cooling. The trailer towing hitch for retrofitting is available from Audi Genuine Accessories.

Trailer towing hitch
removable and lockable, sphere bar and ball head made from forged steel, the 13-pin socket can be swivelled out of sight behind the bumper skirt; when removed, the trailer towing hitch can be stored in the spare wheel well; including trailer stabilisation system via Electronic Stability Control (ESC)

High-gloss package
roof frame and window capping strips in anodised aluminium, external B-pillar trim and triangular panels on the rear doors in high-gloss black

Audi exclusive black styling package
radiator grille frame and console in air intake grilles at the side (S line exterior pack) in high-gloss black. Radiator grille, number plate holder, roof frame, window capping strips and roof rails (Avant) in matt black. From quattro GmbH

Aluminium-look exterior
roof rails, roof frame and window capping strips in anodised aluminium, exterior B pillar trim and triangular panels on the rear doors in high-gloss black, sill extension with stainless steel insert

Bumpers
front and rear with distinctive sporty design, painted in body colour (for A4 allroad quattro in contrasting paint finish); for S4/S4 Avant: S rear diffuser and rear blade in aluminium look

Roof edge spoiler

Audi Singleframe
A4/A4 Avant: radiator grille in stone grey: A4 allroad quattro: radiator grille in platinum grey with vertical struts; S4/S4 Avant: radiator grille in platinum grey with horizontal chrome struts

Exhaust tailpipes

A4 Saloon:
single-branch design, 2 tailpipes on the left for 1.8 TFSI, 2.0 TFSI [not including 2.0 TFSI quattro (132 kW) flexible fuel] and 2.0 TDI, and chrome-plated surrounds for clean diesel; dual-branch design with 1 tailpipe each left and right for 2.0 TFSI quattro (132 kW) flexible fuel, beaded and matt for 3.0 TFSI (200 kW) and 3.0 TDI;

A4 Avant:
single-branch design, 2 tailpipes on the left for 1.8 TFSI (88 kW) and 2.0 TDI, with chrome-plated surrounds for 3.0 TDI clean diesel;
dual-branch design with 1 tailpipe each left and right for 1.8 TFSI (125 kW) and 2.0 TFSI, beaded and matt for 3.0 TFSI (200 kW) and 3.0 TDI;

A4 allroad quattro:
single-branch design, 2 tailpipes on the left with chrome-plated surrounds for 2.0 TDI and 3.0 TDI clean diesel;
dual-branch design, 1 tailpipe each on the left and right with chrome-plated surrounds for 2.0 TFSI, beaded and matt for 3.0 TDI;

S4 Saloon:
dual-branch design with 2 oval tailpipes each left and right with chrome-plated surrounds;

S4 Avant:
dual-branch design with 2 oval tailpipes each left and right with chrome-plated surrounds;

Rear spoiler
integrated in the luggage compartment lid

Sill trims
S4/S4 Avant: painted in body colour (for A4/A4 Avant only available in conjunction with S line exterior package); A4 allroad quattro: painted in contrasting colour

Model name/logo
model name (for A4 /A4 Avant additionally the technology name) on the luggage compartment lid, quattro logo (on quattro models) on the radiator grille, on the luggage compartment lid and on the passenger's side of the dashboard, model name or technology name can also be omitted from the rear if required; S4/S4 Avant: S4 model name on the luggage compartment lid and the radiator grille, on the leather-covered sports steering wheel and in the rev counter, quattro logo on the passenger's side of the dashboard, V6 T emblem on the front wings

Underbody protection
front and rear, in stainless steel

Seats/seating comfort

4-way lumbar support
electric, for driver and front-passenger seats, with horizontal and vertical adjustment

Driver seat, electrically adjustable
electric seat height, fore/aft position, seat and backrest angle adjustment for the driver seat, front-passenger seat manually adjustable, electric 4-way lumbar support for driver and front-passenger seat

Front seats, electrically adjustable
electric adjustment for seat height, fore/aft position and seat and backrest angles, with electric 4-way lumbar support

Memory function for the driver seat
2 different presets for the electrically adjustable driver seat and exterior mirrors

Folding rear seats
can be split and folded 40 : 60 or fully

Seat heating, front
heats the seat cushions and backrests; on sports seats or leather upholstery and trim also heats the seat side bolsters; individually adjustable in several stages for driver and front-passenger seats

Seat heating, front and rear
equipment as for seat heating, front, additionally also for the outer rear seats

Centre armrest, front
adjustable lengthways; with fold-open storage compartment and two 12V sockets in the centre console

Centre armrest, rear
folding

Seats/seating comfort

Leather-covered armrests in the door trims
in leather, for an exclusive interior look

Head restraints
front and rear, height adjustable; S4/S4 Avant: integrated head restraints on S sports seats, front not adjustable

ISOFIX child seat mounting for the front-passenger seat
standard mounting for practical attachment of child seats in accordance with ISO standards. With deactivation switch for the front-passenger airbag

ISOFIX child seat mounting for the outer rear seats
standard mounting for practical attachment of child seats in accordance with ISO standards. Contact your Audi partner for compatible child seats.

Steering wheels/gear levers/controls

Leather-covered multifunction steering wheel in 4-spoke design
with full-size airbag, manually adjustable in height and reach, including gear lever knob or selector lever knob and gaiter in leather, for operating the basic functions of Audi navigation systems, radios, voice control system, Bluetooth interface, preparation for mobile phone or car phone

Steering wheel in 4-spoke design
with full-size airbag, manually adjustable for height and reach, black

Leather-covered steering wheel in 4-spoke design
with full-size airbag, manually adjustable for height and reach, includes leather gear lever knob or selector lever knob and gaiter

Leather-covered multifunction sports steering wheel in 3-spoke design
with full-size airbag, manually adjustable in height and reach, including gear lever knob or selector lever knob and gaiter in leather, for operating the basic functions of Audi navigation systems, radios, voice control system, Bluetooth interface, preparation for mobile phone or car phone; optionally available with shift paddles behind the steering wheel; with S4/S4 Avant: with S4 emblem, decorative stitching in contrasting colour and shift paddles behind the steering wheel in aluminium look

Leather-covered sports steering wheel in 3-spoke design
with full-size airbag, manually adjustable for height and reach, includes leather gear lever knob or selector lever knob and gaiter

Steering wheel rim with wooden segments
available in walnut, dark brown in 4-spoke design for leather-covered multifunction steering wheel, optionally with shift paddles. From quattro GmbH

Leather-covered multifunction sports steering wheel in 3-spoke design, flattened at the bottom
with full-size airbag, manually adjustable in height and reach, including gear lever knob or selector lever knob and gaiter in leather, for operating the basic functions of Audi navigation systems, radios, voice control system, Bluetooth interface, preparation for mobile phone or car phone; optionally available with shift paddles behind the steering wheel; with S4/S4 Avant: with S4 emblem, decorative stitching in contrasting colour and shift paddles behind the steering wheel in aluminium look

Steering wheel rim in Audi exclusive leather
Leather and stitching available in all Audi exclusive colours; stitching on the steering wheel rim with specific Audi exclusive seam detail. From quattro GmbH.

Audi exclusive steering wheel rim with wooden segments
available in Audi exclusive woods in 4-spoke design for leather-covered multifunction steering wheel, optionally with shift paddles. Leather and stitching available in various Audi exclusive colours; stitching on the steering wheel rim with specific Audi exclusive seam detail. From quattro GmbH

The model-specific standard and optional equipment can be found in the index from page 124 onwards.

Steering wheels/gear levers/controls

Gear lever knob in Audi exclusive aluminium
From quattro GmbH

Controls in Audi exclusive leather
Leather covering of the steering wheel rim, gear/selector lever knob and gaiter available in all Audi exclusive colours; individual choice of colour for stitching in various Audi exclusive colours with Audi exclusive-specific stitching pattern.
From quattro GmbH.

Climate control

3-zone deluxe automatic air conditioning
with sunlight-dependent control, electronically controls the air temperature, flow rate and distribution, separate temperature distribution for driver, front-seat passenger and rear compartment, temperature and air distribution adjustable left and right in the front, control panel for setting the temperature in the rear compartment in the rear centre console, automatic recirculation mode by means of air quality sensor, front control panel features digital display, includes rain, light and humidity sensor, combined fine-dust filter, indirect ventilation, key-coded settings

---

Automatic air conditioning system
with sunlight-dependent control, electronically regulates the air temperature, flow rate and distribution, with ram air control and manual recirculation mode, humidity sensor, dust and pollen filter, defroster vents for the windscreen and the side windows, key-coded settings

---

Auxiliary heating/ventilation
The auxiliary heating heats up the interior and frees the windows from ice, the ventilation system supplies fresh air and reduces the interior temperature; complete with timer and separate radio-operated remote control with radio feedback

Luggage securing and storage systems

Reversible luggage compartment floor
one side in high-quality velour, the other side as a waterproof, hard-wearing dirt collecting tray

---

Storage compartments
in the front and rear door trims with storage for drinks bottles, glove compartment on the front-passenger side, eyewear compartment in the front interior lighting module, above the interior mirror

---

Storage package
includes storage nets on the front-seat backrests, storage compartment under the front seats (if memory function for the driver seat is fitted, only under the front-passenger seat), cup holder in the rear centre armrest and a locking glove compartment

---

Cup holders
in the centre console

Luggage securing and storage systems

Through-loading facility with removable ski and snowboard bag
secured by a strap, for practical transportation of long objects e.g. up to 4 pairs of skis or 2 snowboards; unrestricted use of the outer rear seats

Partition net
for fastening to the bodywork or to the folded-down rear seats, useful when the rear seats are up or folded down on one side, as well as when they are folded down on both sides; removable

Lashing points
4 in the luggage compartment, for attaching luggage and other objects, attachment points for the combined net

Reversible mat
for the luggage compartment, velour on one side, rubber on the other, to cover the whole luggage compartment, also when the rear seat backrest is folded down, with fold-out protective film for the loading sill and bumper

Rail system with securing set
in the luggage compartment, with telescopic rod and fastening strap, for partitioning the luggage compartment and securing objects according to requirements

Luggage compartment package
consisting of a combined net in the luggage compartment, fastening hooks, luggage net on the right hand side of the luggage compartment and 12V socket

Luggage compartment cover
easy loading and unloading of the luggage compartment. When the tailgate is open, the cover slides upwards in special guides as soon as it is lifted slightly.

Further interior equipment

Audi exclusive carpet and floor mats
Individual choice of colour for carpets, floor mats and piping from the range of Audi exclusive colours.
From quattro GmbH

Floor mats front
in velour, coordinated with the corresponding carpet colour

Floor mats, front and rear
in velour, coordinated with the corresponding carpet colour

Audi exclusive floor mats
Individual choice of colour for floor mats and piping from the range of Audi exclusive colours.
From quattro GmbH

Door sill trims
on door sills; for A4 allroad quattro with aluminium insert and allroad quattro logo and for S4/S4 Avant with aluminium insert and S4 logo

Window controls
electric front and rear, with safety system to limit closing force, one-touch open/close with convenience function

Cigarette lighter and ashtrays
ashtrays in the centre console, front and rear, cigarette lighter integrated in the front ashtray

Grab handles
cushioned action, folding, four handles recessed into the roof, clothes hooks on the rear grab handles

12V socket
in the side trim of the luggage compartment on the right-hand side at the rear

230V socket
in the centre console in the rear, replaces the rear 12V socket

Sun visors, extendable
on the driver and front-passenger sides

Aluminium look in the interior
on the light switch, air conditioning, MMI rotary/push-button control, vents, mirror adjustment switch, window controls and around the gear or selector lever gaiter

Pedals and footrest in aluminium look
underline the sporty character of the S4 and S4 Avant.

The model-specific standard and optional equipment can be found in the index from page 124 onwards.

MMI® navigation
with navigation data (DVD), 6.5-inch colour display with high-quality map representation and further numerous detailed display options, voice control (destination entry via spelling), dynamic route guidance with TMC (where available), MP3 and WMA-compatible DVD player for navigation data (DVD), can also be used for music CDs, additional arrow display in the driver information system, 2 SDHC card readers (for up to 32 GB), AUX-IN connection, 8 passive loudspeakers (front and rear), total output 80 watts

---

Navigation data (DVD)
contains navigation data for the following countries (where digitised): Albania, Andorra, Austria, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Hungary, Iceland, Ireland, Italy, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Moldova, Monaco, Montenegro, the Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain (including the Canary Islands), Sweden, Switzerland, the UK, Ukraine, the Vatican

MMI® navigation plus
including navigation data (hard drive), high-resolution 7-inch colour display with high-quality map display and topographical map colour, navigation-based speed limit display and display of lots of sightseeing information and 3D city models, choice of 3 alternative routes provided, scrolling along the route, joystick map manoeuvring function in the control button, spoken TMCpro reports, split-screen route information (manoeuvring points, points of interest on motorways, TMCpro on route), detailed junction map and lane recommendations, dynamic route guidance with TMCpro (where available), voice control system (destination entry by means of whole word input in a sentence), additional arrow display in the driver information system with colour display, 8 passive loudspeakers (front and rear), total output 80 watts, radio with triple tuner and phase diversity, hard drive can also be used to store music (20 GB), MP3, WMA, AAC and MPEG-4-compatible DVD player can also be used for music and video DVDs, 2 SDHC card readers (for up to 32 GB), AUX-IN connection. The use of Audi connect services (e.g. navigation using Google Earth images and Street View, weather and news, Audi traffic information online*) is possible in combination with Bluetooth car phone online. (Can only be ordered in conjunction with a driver information system with colour display and a leather-covered multifunction steering wheel)

Navigation data (hard drive)
contains navigation data for the following countries (where digitised):
Europe: Albania, Andorra, Austria, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Hungary, Iceland, Ireland, Italy, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Moldova, Monaco, Montenegro, the Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain (including the Canary Islands), Sweden, Switzerland, the UK, Ukraine, the Vatican
North America: Bahamas, Canada, Mexico, Puerto Rico, USA (inc. Alaska, Hawaii, Virgin Islands)
Other regions: AGCC (Abu Dhabi, Bahrain, Dubai, Qatar, Kuwait, Oman, Saudi Arabia), China, Japan, Hong Kong, Macao, Malaysia, Singapore, Australia, New Zealand, South Africa

* Available in Germany, Switzerland, Austria, Belgium, the Netherlands, Luxembourg, the UK, France and Italy.

MMI® and navigation systems

Driver information system with colour display
a high-resolution colour display provides you with information from the trip computer, auto check system, scope of display of the MMI system, brake wear indicator at front, clock and digital speed display; the outside temperature display shows an ice crystal at temperatures under +5 °C to warn of possible black ice. The colour display is also used to indicate the current gear in vehicles with manual transmission. The integrated efficiency program assists you by providing consumption data summaries, a display of additional consumers, a larger gearshift display and tips for more fuel-efficient driving. Including attention assist

Driver information system
a monochrome display provides you with information from the trip computer, auto check system, scope of display of the MMI system, brake wear indicator at front, clock and digital speed display; the outside temperature display shows an ice crystal at temperatures under +5 °C to warn of possible black ice. The display is also used to indicate the current gear in vehicles with manual transmission. The integrated efficiency program assists you with consumption data overviews, a display of additional consumers and fuel-saving tips for more economic driving. Including attention assist

Attention assist
Part of the driver information system; the attention assist analyses driving behaviour using a range of sensors and warns if anything indicates that the driver is starting to become inattentive. Steering movements and switch/pedal actuation are recorded and compared with the individual driving patterns of the respective driver. Attention assist warns the driver by means of a display in the driver information system and an acoustic signal. The system is active from 65 km/h and can be deactivated at any time via the car menu.

Radio and TV systems

chorus radio
with CD player, dynamic station list, 30-station memory, FM (VHF) and AM (MW, LW) reception, MMI operating concept, 6.5-inch monochrome screen, speed-dependent volume control, phase diversity, 8 passive loudspeakers (front and rear), total output 80 watts; note: certain car menu settings cannot be made using the chorus radio.

Digital radio reception
In addition to the range of analogue stations, programmes from digitally broadcast radio transmitters with better sound quality can be received according to DAB standard, including DAB+. Display of additional information accompanying the programme (e.g. artist, title, cover) in the form of a slide show and other programme-independent data services (e.g. weather, traffic, news). In connection with MMI navigation or MMI navigation plus also reception of DMB audio, a 2nd DAB tuner permanently searches for alternative reception frequencies of the set radio station, at the same time the station list is updated. Please note: reception depends on local digital network availability; contents and scope of the additional information depend on provision by the respective radio station.

Loudspeakers, front and rear
8 passive loudspeakers, total output 80 watts

concert radio
equipment as chorus radio; plus 6.5-inch TFT colour display, SDHC card reader (up to 32 GB), both MP3, AAC and WMA-compatible, TP memo function and AUX-IN connection

TV reception
Reception of digitally-broadcast (DVB-T), uncoded television stations (MPEG-2 or MPEG-4 standard), DVB-T audio stations, teletext and Electronic Programme Guide (EPG). External AV-IN connection via adapter cable (available through Audi Genuine Accessories). Please note: TV reception depends on local digital network availability; no picture possible when the vehicle is moving

Audi sound system
6-channel amplifier, 10 speakers including centre speaker in the dashboard and subwoofer in the rear parcel shelf (for A4 Avant/A4 allroad quattro/S4 Avant: in the spare wheel well), total output 180 watts

The model-specific standard and optional equipment can be found in the index from page 124 onwards.

symphony radio
equipment as concert radio, plus integrated 6-disc CD changer

---

Bang & Olufsen Sound System
surround sound reproduction via 14 high-performance speakers, 1 centre speaker and 2 midrange speakers in the dashboard; 1 tweeter in each mirror quadrant; 1 woofer in each front door; 2 tweeters and 2 low/midrange units in the rear doors; 2 surround sound speakers and 1 subwoofer in the parcel shelf (for A4 Avant/A4 allroad quattro/ S4 Avant: in the spare wheel well), exclusive speaker covers with aluminium trim, dynamic driving noise compensation, 10-channel amplifier, total output 505 watts. The reproduction of 5.1 Surround Sound is possible in conjunction with MMI navigation plus and the integrated DVD drive.

CD changer
in the glove compartment, for 6 CDs (MP3 and WMA-compatible), shock-resistant, easily accessible, without magazine, each CD can be loaded and changed individually. Music files with digital rights management (DRM) cannot be played.

Audi music interface
for the connection of Apple iPods from generation 4, Apple iPhones (music functionality) as well as USB storage media and MP3 players. The Audi music interface is located in the glove compartment and operated via MMI navigation plus, MMI navigation, symphony radio, concert radio or a leather-covered multifunction steering wheel. Please note: can only be used in conjunction with a special adapter cable (available from Audi Genuine Accessories). Please contact your Audi partner or visit www.audi.com/mp3 on the Internet for information on compatible MP3 players. (In conjunction with the Audi music interface, the AUX-IN connection is omitted.)

Adapter cable set for Audi music interface
consisting of 2 connection cables for the connection of iPod/iPhone or storage media/media player with USB connection (type A); further adapter cables available from Audi Genuine Accessories. Visit www.audi.com/ mp3 for information on compatibility

---

Adapter cable set plus for Audi music interface
in addition to the adapter cable set for Audi music interface support for the representation of cover arts and video function, depends on the iPod used; can only be used in conjunction with more recent iPod generations, for information on compatibility visit www.audi.com/mp3. Other adapter cables are available from Audi Genuine Accessories

---

Preparation for Rear Seat Entertainment
includes pre-installed wiring and mounts for the holders in the driver and front-passenger seat backrests. The appropriate Audi Entertainment mobile (9-inch screen with integrated DVD player) and the holder are available as a plug-and-play unit from Audi Genuine Accessories.

Telephone and communication

Handset for the Bluetooth car phone and Bluetooth car phone online
with colour display and built-in SIM card reader, for making private calls; texts can be easily written thanks to automatic word recognition. Handset is stored in the front centre armrest

---

Bluetooth interface
Bluetooth-capable mobile telephones can be connected to the vehicle via the interface. Hands-free calls can be made in the vehicle via the microphone. Visit www.audi.com/bluetooth for information on compatibility

---

Preparation for mobile phone (Bluetooth)
comprises a hands-free facility and voice control for telephone functions as well as a fitting for optional mobile-specific charger in the centre console between driver and front-passenger seat; operation via MMI navigation plus, MMI navigation, concert radio, symphony radio, a leather-covered multifunction steering wheel or, where present, via the voice control system. Please contact your Audi partner or visit www.audi.com/bluetooth for adapters and information on compatible mobile phones.

Bluetooth car phone
your Bluetooth-capable mobile phone can be conveniently connected to the GSM module inside the vehicle (provided that your mobile has SIM Access Profile), additional SIM card reader located in the surround of the MMI navigation. Transfer of phone book entries to the vehicle and management of call lists; simple operation using MMI navigation, a leather-covered multifunction steering wheel or voice control system. Visit www.audi.com/bluetooth for information on compatibility

Bluetooth car phone online
Your Bluetooth-capable mobile phone can be conveniently connected to the vehicle's internal UMTS module (provided: the mobile phone has a SIM Access Profile), additional SIM card reader located in the surround of the MMI navigation plus. Transfer of phone book entries to the vehicle and management of call lists. Including the Audi connect services traffic information online*, point-of-interest search, navigation by means of Google Earth images and Street View, destination entry, information services e.g. weather and Wi-Fi hotspot for Internet access in the rear using a mobile end device (e.g. laptop).
Due to the high data volumes (currently effects in particular navigation with the help of Google Earth images and Wi-Fi hotspot) a mobile phone contract including a data flat rate is strongly recommended.
The content and scope of the Audi connect services offered may vary and are only available for mobile phone contracts including a data option and only within the coverage of the mobile phone network; additional costs arise for the use of these services (charges and billing correspond to your personal mobile phone contract); they are only offered in Europe (in Russia: in the Moscow and St. Petersburg areas only; not offered in Turkey, Cyprus, Malta and Iceland); simple operation via the MMI navigation plus, a leather-covered multifunction steering wheel or the voice control system. Visit www.audi.com/bluetooth for information on compatibility

Assistance systems

Audi side assist
lane change assistant, working within system limits at speeds of 30 km/h and above, the system uses radar technology to monitor the area on the left, right and behind the moving vehicle and informs or warns the driver by means of an LED display in the exterior mirror if the Audi side assist has detected another vehicle assessed as critical for lane-changing.

---

adaptive cruise control
automatic distance control (control range 30 – 200 km/h); working within system limits, it uses a radar sensor to detect vehicles ahead and maintain this distance by automatic braking and accelerating; 4 distance levels and different driving modes can be selected individually; including Audi pre sense front: The Audi braking guard warns the driver about a detected imminent collision with the vehicle in front through an extended braking assist feature; extended by the function of maximum deceleration: this is initiated at speeds below 30 km/h if there is a danger of collision with a stationary or moving vehicle in order to avoid this collision if possible.

The model-specific standard and optional equipment can be found in the index from page 124 onwards.

Assistance systems

Parking system plus with rearview camera
acoustic and visual parking aid for front and rear, image of area behind the vehicle shown on the MMI display, with dynamic display modes showing the calculated path (steer-angle dependent); includes help lines and guidelines for parking into cross parking spaces and identification of point at which to apply opposite lock when parallel parking, reversing camera integrated discreetly in the handle strip of the luggage compartment lid

---

Assistance package
The assistance package contains the functions of the following assistance systems:
parking system plus (upgrade option to parking system plus with reversing camera), Audi active lane assist and adaptive cruise control.

Parking system, rear
makes reverse parking easier within system limits by indicating acoustically how far away the vehicle is from an object detected behind the vehicle; measurement is by ultrasonic sensors integrated discreetly in the bumper

---

Parking system plus
acoustic and visual park assist system for the front and rear with MMI screen display; measurement is by ultrasonic sensors concealed in the bumpers

---

Audi active lane assist
lane compliance assistant; supports the driver within system limits comfortably in keeping in the lane (operating range 60 – 250 km/h). If the system is activated and ready and the driver has not operated the indicators, the Audi active lane assist will guide the vehicle within recognised lane boundary lines by means of gentle, corrective steering intervention; the driver can choose whether to be monitored continuously or just shortly before crossing the traffic lane marker (choice of earlier or later steering time); additional steering vibration can be adjusted if the driver wishes

Hold assist
holds the vehicle stationary for unlimited periods after stopping, on almost every uphill and downhill gradient. The system is activated by push-button and allows the driver to drive away easily and comfortably without having to operate the electromechanical parking brake.

Cruise control
at speeds of 30 km/h and above, the system keeps the set speed constant, provided that engine power and engine braking effect permit it; also features active braking intervention, e.g. when driving downhill; operated via separate steering column stalk; set speed displayed in the driver information system

Suspension/brakes

Audi drive select
changes vehicle characteristics, e.g. by adapting power steering assistance, accelerator and gearshift characteristics, and the system also influences other optional equipment; available modes: comfort, auto, dynamic, efficiency and – in conjunction with an MMI navigation system – individual.
The efficiency mode shifts the engine, automatic transmission, climate control and optional Audi adaptive cruise control or cruise control into a consumption-optimised basic setting.

Dynamic steering
When changing lanes, parking and cornering, this system improves comfort and handling by dynamically regulating steering according to the driving situation. In addition to adaptation of the steering effort (as with the electromechanical power steering), the steering angle is also adapted (steering ratio). The system is also supported further by vehicle stabilisation through ESC.

Dynamic suspension
providing outstanding handling and exceptional levels of driving comfort with 5-link lightweight front axle, tubular anti-roll bar; trapezoidal-link rear axle with independent wheel suspension; twin-tube gas-filled shock absorbers and coil springs, front axle carrier rigidly fixed to the body, flexibly mounted axle supports at rear

---

Suspension with damper control
electronically controlled adaptation to different driving situations (for S4/S4 Avant: on the basis of the S sports suspension); dynamic or comfort-oriented characteristic of the damper coordination can be adapted over Audi drive select.

* Free usage rights for 36 months following initial activation. If this does not take place within the first 6 months of vehicle registration, the free usage right period is shortened accordingly. Your Audi partner will be happy to inform you about the extension options and any costs these may incur.

Suspension/brakes

Sports suspension
vehicle lowered by approx. 20 mm compared with dynamic suspension, with stiffer spring and damper tuning for more direct contact with the road and sporty handling

S line sports suspension
with more dynamic suspension tuning and vehicle lowered by a further 10 mm compared with sports suspension

S sports suspension
with stiffer spring and damper tuning for more direct contact with the road and sporty handling; 5-link lightweight front axle, tubular anti-roll bar, trapezoidal-link rear axle with independent wheel suspension; twin-tube gas-filled shock absorbers and coil springs, front axle carrier rigidly fixed to the body, flexibly mounted axle supports at rear

Brake system
dual-circuit with diagonally-split brake system, Antilock Brake System (ABS) with Electronic Brake force Distribution (EBD), Electronic Stability Control (ESC) with brake assist, tandem brake booster, disc brakes front/rear, ventilated at front

Brake callipers
for S4/S4 Avant: painted black, at the front with S4 emblem

Electromechanical parking brake
includes parking brake function when stationary, drive-off assistance function by means of automatic release when driving away and emergency braking function whilst driving by means of action on all 4 wheels

Technology/safety

Body, galvanised
(fully-galvanised in areas at risk from corrosion), unitary construction, welded to the floor pan, front and rear areas feature defined crumple zones, aluminium front wings. (12 year guarantee against rust perforation)

Airbags
adaptive front-end collision protection with seat position recognition and full-size airbag for driver and front passenger; side airbags at front (thorax/pelvis airbag); including head airbag system, unfolds over the entire length of the side windows in the area of the 1st and 2nd row of seats and protects the passengers in the front and rear seats in the event of a side impact

Side airbags, rear
supplement the side impact protection in the doors (thorax/pelvis airbags)

Integrated head restraint system
In the event of a rear-end collision, the design of the seats stabilises the upper torso and provides better support for the head. This increases the level of protection and reduces the risk of a whiplash injury.

Seat belts
3-point inertia reel seat belts for all seats, with belt force limiters, seat belt tensioners and front seat-belt reminder; colour-coordinated with the interior

Instrument cluster
with adjustable lighting, electronic speedometer with odometer and trip odometer, rev counter and automatic ready-check when engine starts, radio-controlled clock (GPS clock in conjunction with MMI navigation plus), coolant temperature display and fuel gauge; S4/S4 Avant: with S-specific grey dials, white needles and S4 logo in the rev counter

Safety steering column
includes a shunt mechanism with damping function to supplement the protection offered by the seat belts and airbags

First-aid kit
in the storage compartment in the rear centre armrest

Warning triangle
with bracket on the inside of the tailgate

Anti-Slip Regulation (ASR)
for improved traction, reduces spinning of the drive wheels

Electronic Differential Lock (EDL)
On surfaces with varying levels of grip, this start-off assistant automatically brakes the drive wheels on any surface that is too slippery, thereby ensuring smooth, powerful progress; operates at speeds up to approx. 100 km/h.

Electronic Stability Control (ESC)
networks the ABS, EBD, ASR and EDL with its own sensors and compares the driving data with reference data; provides better stability at all speeds by targeted braking of individual wheels and intervention in the engine management system

ESC with electronic axle-differential lock
The electronic axle-differential lock function is integrated in the ESC on front-wheel drive models. It distributes the drive torque by means of targeted braking actions, depending on the driving situation. The axle-differential lock actively countersteers in corners. The result is improved traction and dynamic performance when cornering and more precise and neutral handling (less understeer). Agility during steering is also improved.

Electromechanical power steering
maintenance-free rack & pinion steering with speed-dependent power steering; precise steering feel at high speeds, excellent assistance when parking

Manual transmission
6-speed, all-synchromesh, hydraulically-actuated dry clutch with asbestos-free linings, 2-mass flywheel

multitronic
the multitronic generation of continuously variable transmissions, featuring dynamic gear control program (DCP) and sport program, 8 different gears can be selected in manual mode, hydraulically controlled multi-plate clutch

The model-specific standard and optional equipment can be found in the index from page 124 onwards.

Technology/safety

S tronic®
The 7-speed, electrohydraulically actuated dual-clutch transmission facilitates shorter gearshift times and gearshifting with virtually no perceptible interruption in the power flow; can be operated via the shift paddles behind the steering wheel (optional, standard with S models) or the selector lever. In automatic mode the driver can choose between the programs D (normal) and S (sport).

Front-wheel drive

quattro®
permanent all-wheel drive with asymmetric/dynamic torque distribution, self-locking centre differential with wheel-selective torque distribution, distributes the drive force depending on the driving situation to each individual wheel for controlled handling

quattro® with sports differential
The electronically controlled sports differential distributes variable amounts of drive force to each wheel and ensures outstanding acceleration performance in corners and stabilises the vehicle's response to load change. It also improves direct steering characteristics and provides more agile handling due to the lower steering effort required.

Start-stop system
helps to reduce fuel consumption and CO_2 emissions by switching off the engine in stationary phases, e.g. at traffic lights. The starting process is initiated as soon as the driver presses the clutch or releases the foot brake for the vehicle to move off again.

Recuperation
increasing the generator voltage converts kinetic energy into usable electrical energy when the vehicle is coasting or braking. This energy is used to assist the generator during subsequent acceleration, saving up to 3 % fuel.

Audi TDI clean diesel
In addition to the standard equipment with catalytic converter and diesel particulate filter, the new exhaust aftertreatment system installed in the model with TDI clean diesel leads to low exhaust emissions. Nitrogen oxides are reduced by the innovative nitrogen oxide catalytic converter (DeNOx catalytic converter) at the end of the exhaust pipe. A pump injects tiny quantities of the biologically degradable additive AdBlue®*. This solution then decomposes in the hot exhaust flow to form ammonia, which splits the nitrogen oxides into nitrogen and water. This splitting is called selective catalytic reduction (SCR). Refill the separate AdBlue® tank as indicated by the information in the display of the instrument cluster. We recommend having the AdBlue tank refilled by your Audi partner (about every 15,000 km).

Misfuelling protection
mechanically prevents incorrect fuelling of diesel vehicles with petrol

flexible fuel
The flexible fuel models can be filled up with fuels, irrespective of the mixture ratio of the petrol and the bio-ethanol E85

Audi Extended Warranty

Audi Extended Warranty
can only be ordered directly and on purchase of a new car; is a consistent continuation of the manufacturer's guarantee so that you are protected against risk and can control servicing costs even after the first 2 years. There is a total of 9 lifetime/total mileage combinations to choose from:

Additional 1 year Audi Extended Warranty, maximum total mileage 30,000 km

Additional 1 year Audi Extended Warranty, maximum total mileage 60,000 km

Additional 1 year Audi Extended Warranty, maximum total mileage 90,000 km

Additional 2 years Audi Extended Warranty, maximum total mileage 40,000 km

Additional 2 years Audi Extended Warranty, maximum total mileage 80,000 km

Additional 2 years Audi Extended Warranty, maximum total mileage 120,000 km

Additional 3 years Audi Extended Warranty, maximum total mileage 50,000 km

Additional 3 years Audi Extended Warranty, maximum total mileage 100,000 km

Additional 3 years Audi Extended Warranty, maximum total mileage 150,000 km

*Registered trademark of the Verband der Automobilindustrie e. V. (VDA).

Audi Genuine Accessories: Suit your Audi as well as your Audi suits you.

The Audi A4 is a special vehicle – as a Saloon it is truly capable to move large items and as the Avant it is a car for the whole family. Lately, it looks even more forward-looking: The A4 and the A4 Avant will impress you visually as well as technically with many innovations. This is also reflected in its functionality: With Audi Genuine Accessories you can make it even more attractive and individual.

Further information can be obtained from the Audi A4 Accessories catalogue, at **www.audi.com**, and from your Audi partner.

1 Roof rack bag
For storage or transportation of carrier unit and smaller roof rack modules. Made of robust material, with several loops and side pocket for matching tools or small parts. Available in 2 sizes.

2 Ski and luggage box (480 l)*
Ski box for winter sports equipment and other luggage. Lockable and can be opened from both sides. Easy-to-clean thanks to smooth surface. Box also available with 350 and 450 l volume. (Can only be used in conjunction with the carrier unit.)

3 Carrier unit
Carrier unit for various roof rack modules such as cycle rack, kayak rack or ski and luggage box. The profile section is made from anodised aluminium tube. The carrier unit is easy to install and lockable. Maximum permissible total weight of carrier, modules and load 90 kg. Available as a carrier unit for the Saloon and as a rail support for the Avant.

4 Snow chains
For improved grip on snow and ice.

5 Cast aluminium winter wheels in 5-arm design
Complete winter wheel in size 7 J x 16 with 225/55 R 16 tyre and 7 J x 17 with 225/50 R 17 tyre, can be fitted with snow chains. You can find further wheels in different designs, including summer wheels, in the special accessories catalogue.

6 Clothes hanger
For jackets, sports jackets and other pieces of clothing. The clothes hanger is mounted on the front head restraints.

7 Boot liner
Tailor-made protection for the luggage compartment. Washable and sturdy. The edge protects the luggage compartment floor better from leaked liquids.

8 Bluetooth hands-free facility
Reproduction via vehicle's internal sound system. Voice control for each function and with no previous training. Connection to up to 5 different telephone directories. Reception and display of SMS messages if the function is supported by the mobile phone. Cannot be used in conjunction with MMI navigation or MMI navigation plus.

*Maximum permissible load 50 kg.

[ ] Data for S tronic. ( ) Explanation of [1] to [11] on page 119.

Audi A4 Avant 2.0 TDI (100 kW 116 g CO_2/km & 120 kW 120 g CO_2/km)

These vehicles stand for extra efficiency Audi models. In these models, the balance between performance and consumption has been further improved. These Audi models are characterised by reduced consumption and CO_2 emissions when compared with standard models. This effect has been achieved by modifications to the vehicle.

The Audi A4 Avant 2.0 TDI models (100 kW 116 g CO_2/km & 120 kW 120 g CO_2/km) are fitted with the following as standard:

- 6-speed manual transmission with longer ratio between 1st and 6th gear
- Driver information system with gearshift and efficiency displays; provides gearshift and fuel-saving tips to help the driver adopt a fuel-efficient driving style
- Fuel-saving tyres with improved rolling resistance
- Improved vehicle trim and various vehicle components for low drag coefficient

As standard the A4 Avant 2.0 TDI (100 kW 116 g CO_2/km) is equipped with steel wheels with full wheel covers, size 7 J x 16 with 205/60 R 16 tyres.
Optionally, the following wheels are available to you:

- Forged aluminium wheels in 10-spoke design, size 7 J x 16 with 205/60 R 16 tyres
- Cast aluminium wheels in 5-spoke design, size 7.5 J x 16 with 225/55 R 16 tyres
- Cast aluminium wheels in 20-spoke dynamic design, size 7.5 J x 17 with 225/50 R 17 tyres
- Cast aluminium wheels in 5-arm design, size 7.5 J x 17 with 225/50 R 17 tyres
- Cast aluminium wheels in 7-arm parabola design, size 7.5 J x 17 with 225/50 R 17 tyres

As standard the A4 Avant 2.0 TDI (120 kW 120 g CO_2/km) is equipped with forged aluminium wheels in 10-spoke design, size 7.5 J x 16 with 225/55 R 16 tyres.
Optionally, the following wheels are available to you:

- Forged aluminium wheels in 10-spoke design, size 7.5 J x 16 with 225/55 R 16 tyres
- Cast aluminium wheels in 5-spoke design, size 7.5 J x 16 with 225/55 R 16 tyres
- Cast aluminium wheels in 20-spoke dynamic design, size 7.5 J x 17 with 225/50 R 17 tyres
- Cast aluminium wheels in 5-arm design, size 7.5 J x 17 with 225/50 R 17 tyres
- Cast aluminium wheels in 7-arm parabola design, size 7.5 J x 17 with 225/50 R 17 tyres

The following equipment is not available for the A4 Avant 2.0 TDI (100 kW 116 g CO_2/km & 120 kW 120 g CO_2/km):

- adaptive cruise control
- Trailer towing hitch
- Dynamic steering
- Suspension with damper control
- Auxiliary heating/ventilation

Audi A4 Saloon 2.0 TDI (100 kW 112 g CO_2/km & 120 kW 115 g CO_2/km)

These vehicles stand for extra efficiency Audi models. In these models, the balance between performance and consumption has been further improved. These Audi models are characterised by reduced consumption and CO_2 emissions when compared with standard models. This effect has been achieved by modifications to the vehicle.

The Audi A4 Saloon 2.0 TDI models (100 kW 112 g CO_2/km & 120 kW 115 g CO_2/km) are fitted with the following as standard:

- 6-speed manual transmission with longer ratio between 1st and 6th gear
- Driver information system with gearshift and efficiency displays; provides gearshift and fuel-saving tips to help the driver adopt a fuel-efficient driving style
- Fuel-saving tyres with improved rolling resistance
- Improved vehicle trim and various vehicle components for low drag coefficient

As standard the A4 Saloon 2.0 TDI (100 kW 112 g CO_2/km) is equipped with steel wheels with full wheel covers, size 7 J x 16 with 205/60 R 16 tyres.
Optionally, the following wheels are available to you:

- Forged aluminium wheels in 10-spoke design, size 7 J x 16 with 205/60 R 16 tyres
- Cast aluminium wheels in 5-spoke design, size 7.5 J x 16 with 225/55 R 16 tyres
- Cast aluminium wheels in 20-spoke dynamic design, size 7.5 J x 17 with 225/50 R 17 tyres
- Cast aluminium wheels in 5-arm design, size 7.5 J x 17 with 225/50 R 17 tyres

As standard the A4 Saloon 2.0 TDI (120 kW 115 g CO_2/km) is equipped with forged aluminium wheels in 4-spoke design, size 7.5 J x 16 with 225/55 R 16 tyres.
Optionally, the following wheels are available to you:

- Forged aluminium wheels in 10-spoke design, size 7.5 J x 16 with 225/55 R 16 tyres
- Cast aluminium wheels in 5-spoke design, size 7.5 J x 16 with 225/55 R 16 tyres
- Cast aluminium wheels in 5-arm design, size 7.5 J x 17 with 225/50 R 17 tyres

The following equipment is not available for the A4 Saloon 2.0 TDI (100 kW 112 g CO_2/km & 120 kW 115 g CO_2/km):

- adaptive cruise control
- adaptive light
- Trailer towing hitch
- Audi lane assist combined with Audi side assist
- Through-loading facility with removable ski and snowboard bag
- Dynamic steering
- Parking system plus with rearview camera
- Suspension with damper control
- Garage door opener (HomeLink)
- Luggage compartment package
- Slide-and-tilt glass sunroof
- Climate-controlled comfort seats, front
- Convenience key
- Spare wheel, space-saving
- Vehicle jack
- Seat heating, front and rear
- Sunblind, electrically adjustable for the rear window
- Auxiliary heating/ventilation
- S sports seats, front
- 230V socket
- Front seats electrically adjustable with memory function for driver seat
- Front seats, electrically adjustable
- Leather-covered armrest in the doors
- CD changer
- S line

[ ] Data for S tronic. ( ) Explanation of [1] to [11] on page 119.

Notes

[1] The figure stated was calculated using the specified measuring procedure (current version of Directive 80/1269/EEC).

[2] Unladen vehicle weight includes driver (68 kg), 7 kg of luggage and fuel tank 90 % full, calculated in accordance with the current version of EC Directive 92/21/EEC. Optional equipment may increase the car's unladen weight and drag coefficient, whereupon the possible payload limit and the top speed will be reduced accordingly.

[3] The engine's power output always decreases with increasing altitude. At 1,000 m above sea level, and for every additional 1,000 m, deduct 10 % from the weight of the outfit (trailer load limit + gross weight of the towing vehicle). Figure for trailer load limit applies to factory-fitted trailer towing hitch. If using the vehicle with a trailer towing hitch for commercial purposes, a digital tachograph may be required under certain conditions.

[4] A vehicle's fuel consumption and CO_2 emissions do not just depend on how efficiently the vehicle uses the fuel, but are also influenced by driving behaviour and other non-technical factors. CO_2 is the greenhouse gas primarily responsible for global warming.

[5] The figures given were calculated using the specified measuring procedures. The figures do not refer to one individual vehicle and do not form part of any offer, but rather should be used purely for purposes of comparison between the different vehicle models.

[6] We recommend using sulphur-free super unleaded fuel (95 RON) complying with DIN EN 228. If not available, use sulphur-free regular unleaded RON 91 fuel in accordance with DIN EN 228, power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10 % (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel in accordance with 692/2008/EC.

[7] We recommend using ethanol fuel E85 or sulphur-free super unleaded RON 95 in accordance with DIN EN 228. If not available, use sulphur-free regular unleaded RON 91 fuel in accordance with DIN EN 228, power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10 % (E10) can generally be used. Fuel consumption details refer to operation with E85 or RON 95 fuel in accordance with 692/2008/EC.

[8] Regulated.

[9] We recommend using sulphur-free diesel in accordance with DIN EN 590. If not available, use diesel in accordance with EN 590.

[10] Refill the separate AdBlue®* tank as indicated by the information in the display of the instrument cluster. We recommend having the AdBlue tank refilled by your Audi partner (about every 15,000 km).

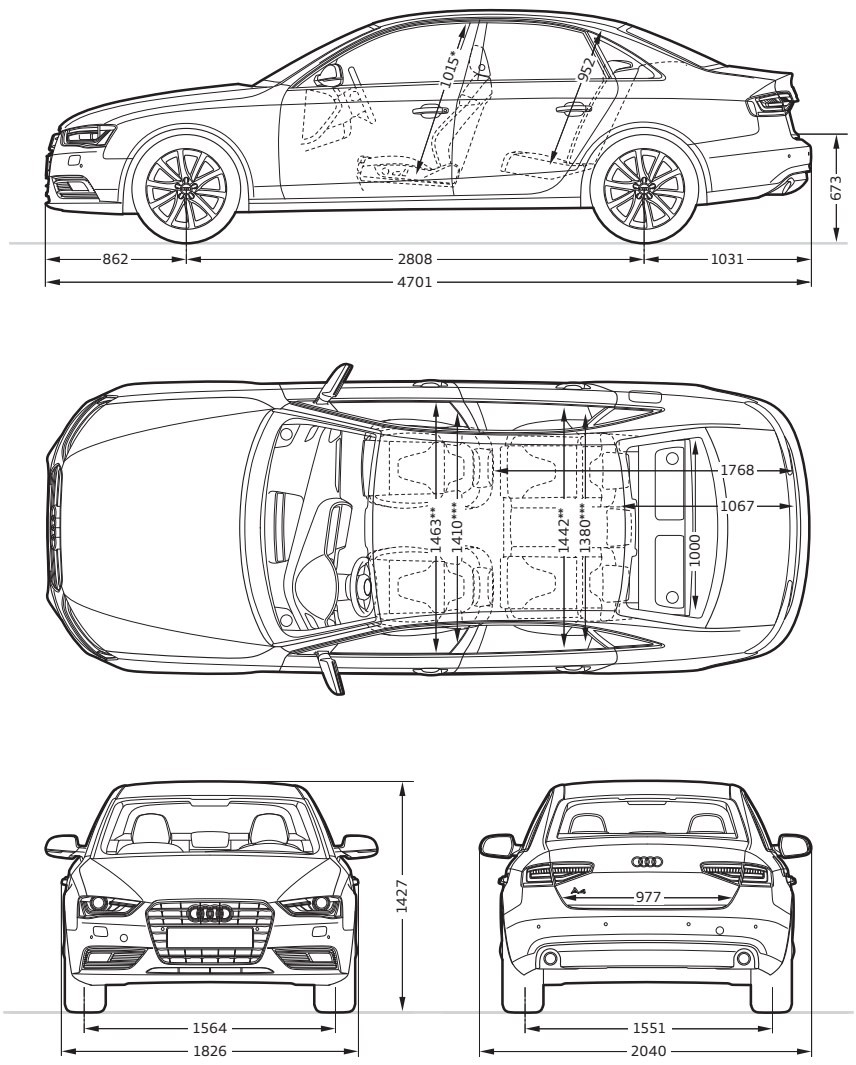
[11] Model with limited range for optional equipment.

*Registered trademark of the Verband der Automobilindustrie e. V. (VDA).

Important note

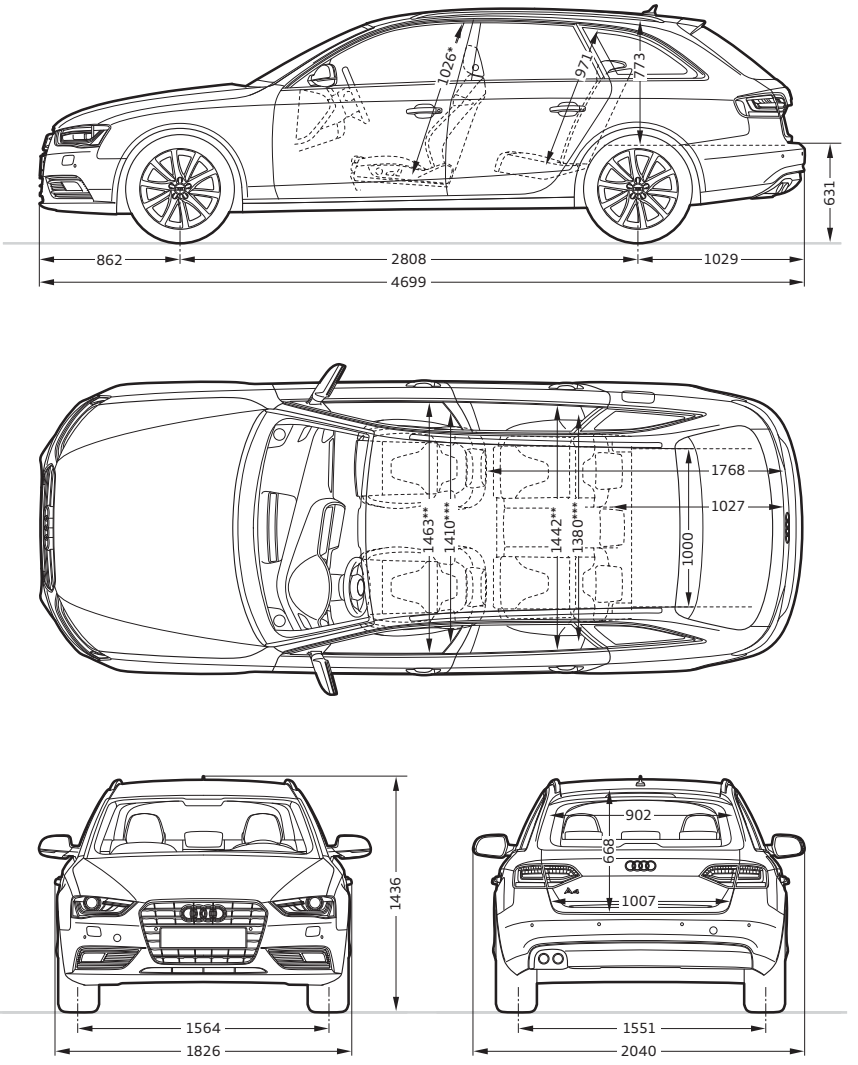
Inspections are due as shown by the service display (every 15,000 km for models with flexible fuel).

Audi A4 Saloon



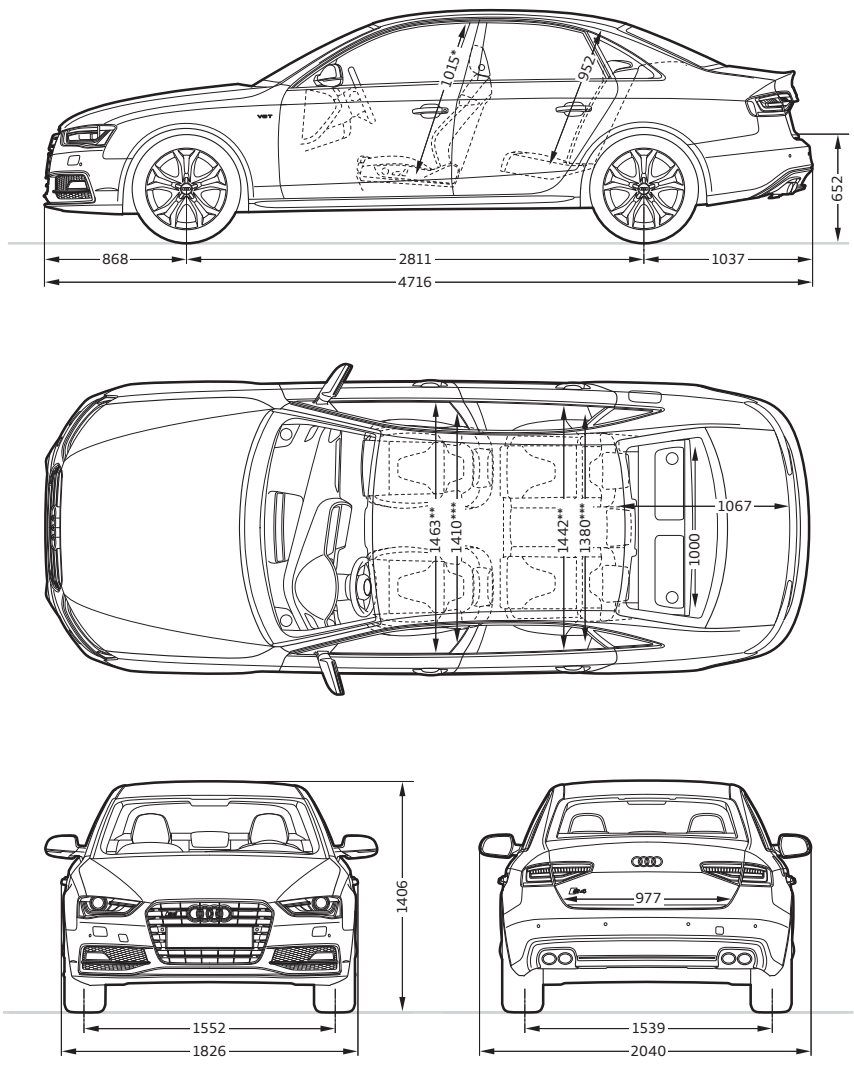
Dimensions in millimetres.
Dimensions were measured with vehicle at unladen weight.
Luggage compartment volume 480/962 l (measured by the VDA standard test method using 200 x 100 x 50 mm blocks; 2nd value with rear seat backrest folded down and vehicle loaded up to the rear parcel shelf). Turning circle approx. 11.5 m.
* Maximum headroom. ** Elbow room width. *** Shoulder room width.

Audi A4 Avant



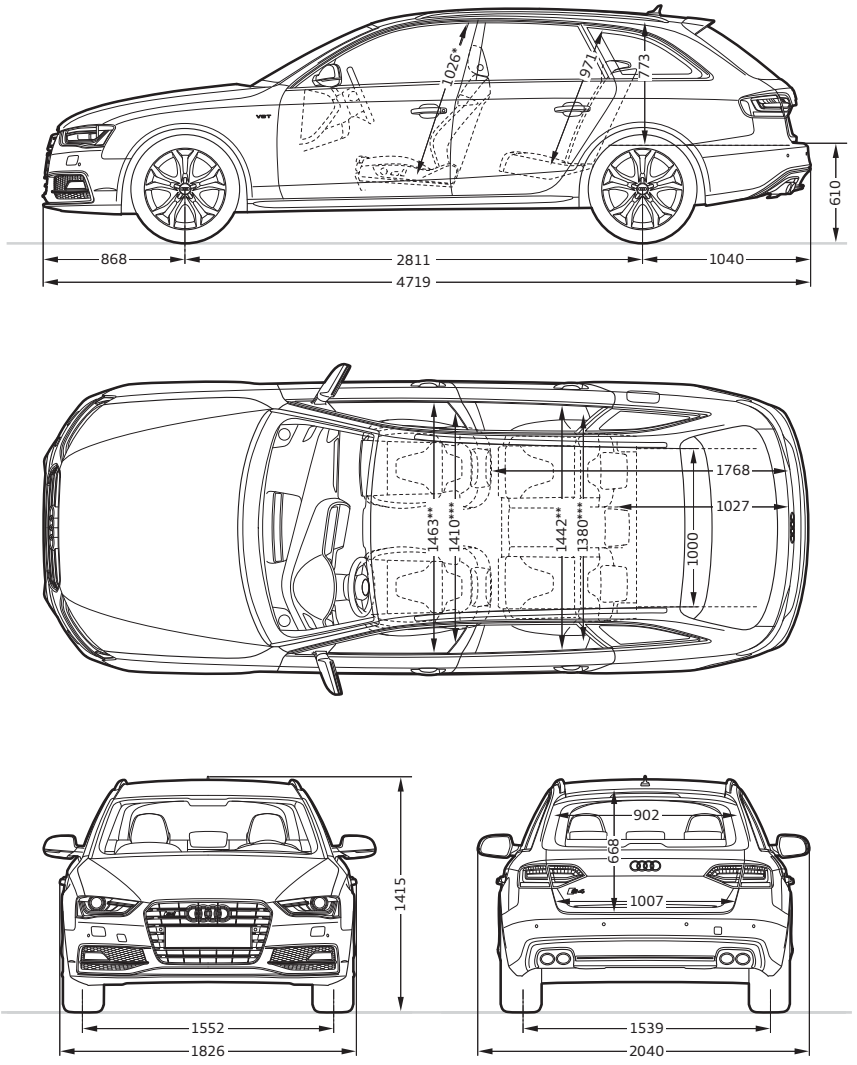
Dimensions in millimetres.
Dimensions were measured with vehicle at unladen weight.
Luggage compartment volume 490/1.430 l (measured by the VDA method, using 200 x 100 x 50 mm blocks; second value with rear seat backrest folded down and vehicle loaded up to roof height). Turning circle approx. 11.5 m
* Maximum headroom. ** Elbow room width. *** Shoulder room width.

Audi S4 Saloon



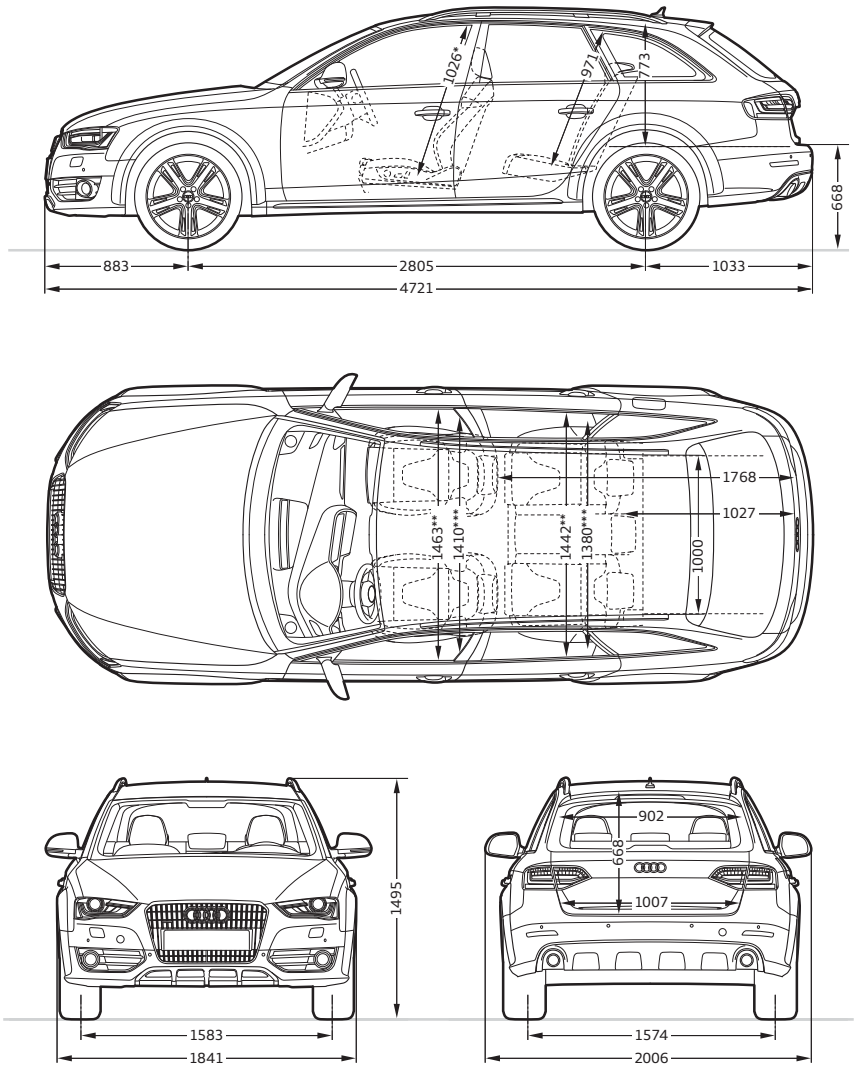
Dimensions in millimetres.
Dimensions were measured with vehicle at unladen weight.
Luggage compartment volume 480/962 l (measured by the VDA standard test method using 200 x 100 x 50 mm blocks; 2nd value with rear seat backrest folded down and vehicle loaded up to the rear parcel shelf). Turning circle approx. 11.5 m.
*Maximum headroom. **Elbow room width. ***Shoulder room width.

Audi S4 Avant



Dimensions in millimetres.
Dimensions were measured with vehicle at unladen weight.
Luggage compartment volume 490/1,430 l (measured by the VDA standard test method using 200 x 100 x 50 mm blocks; 2nd value is with the rear seat backrest folded down and the vehicle loaded up to roof height). Turning circle approx. 11.5 m
*Maximum headroom. **Elbow room width. ***Shoulder room width.

Audi A4 allroad quattro



Dimensions in millimetres.
Dimensions were measured with vehicle at unladen weight.
Luggage compartment volume 490/1.430 l (measured by the VDA method, using 200 x 100 x 50 mm blocks; second value with rear seat backrest folded down and vehicle loaded up to roof height). Turning circle approx. 11.5 m
*Maximum headroom. **Elbow room width. ***Shoulder room width.

At Audi, you get much more than just an Audi.

Anybody who chooses an Audi chooses a brand that offers its customers more.
More individuality. More exclusivity. And more fascination.

www.audi.com

Vorsprung durch Technik, and everything that it entails: the legendary Audi history, dates of unforgettable events and ground-breaking innovations – let your fascination grow with the Audi brand.
> www.audi.com

Audi configurator

Create your own personal Audi using the Audi configurator. All current models, engines, colours and equipment options are available for you to choose from.
> www.audi.com

Audi tv

On Audi tv you can discover new facets of our brand with the four rings: exciting commentaries on our models, technical innovations, fascinating events from the fields of motorsport, tradition, culture and lifestyle. Take a look behind the scenes. The latest news every day. Round the clock.
> www.audi.tv

Audi Bank

Financing. Leasing. Insuring. Whichever new Audi you decide on, every quotation from the Audi Bank is individually tailored to you: Our special offer packages, for example, combine current financing and leasing options with comprehensive insurance protection and thus offer you unlimited mobility.

The models and equipment versions illustrated and described in this brochure and some of the services listed are not available in all countries. Some of the cars illustrated are equipped with optional features for which an extra charge is made. Details concerning the delivery specifications, appearance, performance, dimensions and weights, fuel consumption and running costs of the vehicle were correct to the best of our knowledge at the time of going to press. Deviations from the colours and shapes shown in the illustrations may occur. No liability is accepted for errors and printing errors. The right to introduce modifications is reserved. Not to be reproduced, including in part, without the written approval of AUDI AG.

This brochure is printed on paper made from pulp bleached without the use of chlorine.
